

# Maryland Strategic Energy Investment Fund

## Report on Fund Activities FY 2017

*prepared by the*

**Maryland**  
Energy  
Administration

## Table of Contents

Introduction

### MEA Programs

- A. Clean Energy Communities Low-to-Moderate Income Grant Program
- B. Clean Energy Grant Programs
- C. Maryland Smart Energy Communities
- D. Commercial and Industrial Grant Program
- E. Kathleen A. P. Mathias Agricultural Energy Efficiency Program
- F. Next Generation Energy Efficiency for the Industrial Sector
- G. Game Changer Competitive Grant Program
- H. Offshore Wind Development Program
- I. Community Wind
- J. Transportation Programs
- K. Combined Heat and Power (CHP) Program
- L. Animal Waste-to-Energy Program
- M. Net Zero Energy Schools
- N. Data Center Energy Efficiency Program
- O. Energy Technical Support
- P. Communications and Marketing
- Q. Administration
- R. Maryland Clean Energy Center support

### Non-MEA Programs

- S. Department of Human Resources Low Income Bill Payment
- T. Department of Housing and Community Development Multifamily Energy Efficiency Housing Affordability (MEEHA)
- U. Department of Housing and Community Development Energy Efficient Homes Construction Loan Fund Program
- V. Department of Housing and Community Development Weatherization Assistance Program
- W. Maryland Department of the Environment Climate Change Programs
- X. Maryland Department of the Environment Energy-Water Infrastructure Program (EWIP)
- Y. Electric Vehicle Excise Tax Credit
- Z. Department of General Services
- AA. Department of Health State Energy Loan Repayments

Appendix A: SEIF Funding Details

Appendix B: FY17 Awardees receiving multiple awards

Appendix C: FY17 Awardees

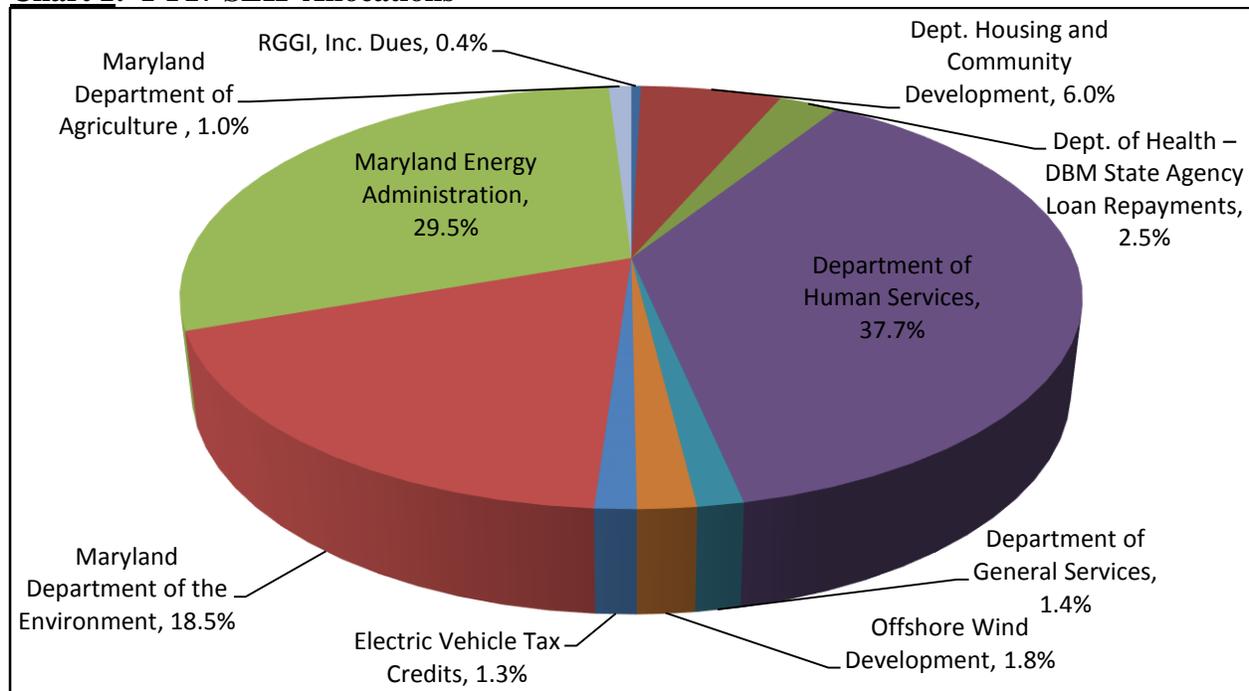

## INTRODUCTION

Pursuant to Section 9-20B-12 of the State Government Article, the Maryland Energy Administration (MEA) is required to prepare an annual report to the Governor and General Assembly. This report, among other things, describes the expenditures of the Strategic Energy Investment Fund (SEIF); grants awarded; energy savings estimated; and programs, projects and activities conducted. The data in this report demonstrates the achievements being made towards promoting affordable, reliable, and cleaner energy for the benefit of all Marylanders.

On behalf of the State, MEA implements its charge through innovative and effective policies, programs, technologies, and financing mechanisms using funds from the SEIF. These programs help reduce household bills, address global climate change concerns, create jobs, attract and retain business, and promote energy independence. In addition to MEA directed programs, funds from the SEIF are allocated to a variety of other agencies that also work to achieve energy and climate-related goals.

A breakdown of the FY17 SEIF allocation is provided in the pie chart directly below.

**Chart 1: FY17 SEIF Allocations**

The SEIF is comprised of a variety of funding sources. The main source of proceeds is from Regional Greenhouse Gas Initiative (RGGI) auctions. The fund also includes income from the Exelon-Constellation/Pepco merger settlements (the Offshore Wind Development Account, Tier 1 Alternative Compliance Payment (ACP), Customer Investment Fund (CIF), Pepco Most Favored Nation (MFN)), other Public Service Commission (PSC) orders, Alternative Compliance Payments from entities that are required to comply with the State’s Renewable Portfolio Standard, and a few other minor sources of funds. Appendix A details each source for each amount received

by the fund, along with a detailed accounting of disbursements from the fund. This appendix also includes details on RGGI auctions, including the number of allowances sold, allowance prices, and estimated future revenues.

Details describing activities funded through the SEIF are provided in the narratives and charts that follow. In addition, MEA annually provides a report on all disbursements over \$25,000 to the Department of Budget and Management (DBM), which publishes the data on its Funding Accountability website. Appendix B provides a list of FY17 grantees receiving multiple SEIF-funded awards from MEA, while Appendix C depicts SEIF amounts disbursed to FY17 awardees.

## MEA PROGRAMS

### A. Clean Energy Communities Low-to-Moderate Income Grant Program

*SEIF Expenditures and Encumbrances: \$10.073 million*

#### *Beneficiaries*

Non-profits and local governments can receive funding from this program to implement energy efficiency measures that benefit low-to-moderate income Marylanders. Past awardees include non-profits, community action agencies, housing authorities, and county and local governments.

#### *Description*

Grants are awarded to projects that generate significant energy savings through energy efficiency, with the benefits of the energy savings being passed on to Maryland's low-to-moderate income residents. Priority is given to projects that maximize energy savings and the number of low-to-moderate income residents that benefit from the measures. Through FY14, MEA allocated grant funds to each county formulaically based on population and income levels. Applications were then evaluated competitively on a county-by-county basis, ensuring a fair distribution of funds across the State. Starting in FY15, the program was expanded to include a statewide competition for larger projects that can help buildings or communities take advantage of economies of scale. Past projects include residential whole building upgrades and energy efficiency improvements to homeless shelters.

FY17 projects are still being installed. For this reason, the anticipated total estimates for FY17 are based on results from previous fiscal years. Some energy measures may be benefitting from other funding sources.

#### *Program Accomplishments*

<b>Fiscal Year</b>	<b>FY17</b>
# of grants	56
Anticipated total kWh savings (once all FY17 projects are completed)(annual)	5,300,000
Anticipated total MMBTU savings (once all FY17 projects are completed)* (annual)	18,000

\*Note: Includes natural gas, propane, and #2 fuel oil

## B. Clean Energy Grant Program

*SEIF Expenditures and Encumbrances: \$4.767 million*

### *Beneficiaries*

Beneficiaries include homeowners, businesses, nonprofits, and State and local government entities that install renewable energy systems.

### *Description*

MEA's Clean Energy Grant Program (CEGP) is designed to support renewable energy installations across the State of Maryland. The Clean Energy Grant Program provides incentives for solar photovoltaic, solar water heating, geothermal heating and cooling, and wind energy systems. Beginning in FY14, the program also included incentives for commercial-scale solar photovoltaic canopy systems that include charging for electric vehicles. Residential incentive levels are set at a fixed amount while commercial incentive levels are established based on the size and type of the renewable energy system. The number of grants processed as part of the CEGP program highlights the popularity of the program.

Some of the FY17 projects are still underway. Generation and capacity estimates for these projects are included in program details below, but are subject to change.

### *Program Accomplishments*

<b>Fiscal Year</b>	<b>FY17</b>
Total # of grants	3,049
Estimated new electricity generation incentivized by CEGP(kWh/year)	31,289,763
Overall Solar PV (kW)	23,858
Solar Thermal (SF)	6,377
Capacity of new Geothermal installed (Ton)	2,170
Wood and Pellet Stove capacity (btu/hr)	26,327,347
Solar PV Canopy (kW) *	5,590
Wind (kW)	0

\* While Solar PV Canopy Capacity is called out separately, it is also included in the Overall Solar PV metric.

### C. Maryland Smart Energy Communities

*SEIF Expenditures and Encumbrances: \$ 1.125 million*

*Beneficiaries:*

Local incorporated governments (towns, cities and counties) benefit from this program. Examples of Maryland Smart Energy Communities participants include Baltimore City, District Heights, Boonsboro, Easton, Indian Head, North Beach and Frostburg; and counties including Frederick, Montgomery, and Harford.

*Description:*

The goal of the Maryland Smart Energy Communities (MSEC) program is to have local governments adopt energy policies and commit to them for the long term, leading to sustained energy savings and additional opportunities for renewable energy development. Once adopted into the program, the local government enacts energy goals and develops an energy baseline. Once the local government has successfully adopted at least two out of three energy policies (i.e., energy efficiency, renewable energy, and transportation), it can leverage program funding to assist with energy projects that help achieve its MSEC goals. Maryland Smart Energy Communities gain a better understanding of their energy usage, enabling them to reduce energy costs and help achieve the State's energy and environmental goals.

*Program Accomplishments*

MSEC now has a total of 68 Maryland communities that have participated in the program, across multiple fiscal years. 25 MSEC awards were made in FY17, with four awards going to new communities.

Energy savings estimates shown below are only based on the FY17 awards to existing MSEC communities for energy projects identified in their respective MSEC grant agreements. Savings from other energy projects that contribute to the MSEC energy goals, but do not receive direct MSEC funding, are not included in the estimates below. In addition, new MSEC communities accepted into the program in FY17 are still developing their specific energy projects so savings from these projects are not included in the estimates below.

<b>Fiscal Year</b>	<b>FY17</b>
# of MSEC awards to municipal governments in FY17	21
# of MSEC awards to county governments in FY17	4
# of new MSEC communities in FY17	4
- # of new MSEC communities in FY17 that have successfully adopted the energy efficiency policy to date	1 of 4

- # of new MSEC communities in FY17 that have successfully adopted the renewable energy policy to date	1 of 2
- # of new MSEC communities in FY17 that have successfully adopted the transportation policy to date	0 of 2
Estimated annual savings (kWh) anticipated from FY17 projects for existing MSEC communities	923,159
Anticipated solar PV capacity (kW) from FY17 projects for existing MSEC communities	101.7
Anticipated Gasoline gallon equivalents (GGE) anticipated from FY17 projects for existing MSEC communities	7,925

\*Note: In FY17, one new MSEC community dropped out of the program prior to executing a grant award with MEA.

<b>Maryland Smart Energy Communities To Date</b>		
Aberdeen	Anne Arundel County	Baltimore City
Baltimore County	Bel Air	Berlin
Berwyn Heights	Bladensburg	Boonsboro
Bowie	Brentwood	Calvert County
Cambridge	Capitol Heights	Cecilton
Chestertown	College Park	Cottage City
Cumberland	Denton	District Heights
Easton	Edmonston	Emmitsburg
Fairmount Heights	Federalsburg	Forest Heights
Frederick	Frederick County	Frostburg
Gaithersburg	Garrett County	Glenarden
Greenbelt	Greensboro	Hagerstown
Harford County	Highland Beach	Hyattsville
Indian Head	Landover Hills	Manchester
Middletown	Millington	Montgomery County
Mount Rainier	New Carrollton	North Beach
Ocean City	Oxford	Prince George's County
Princess Anne	Ridgely	Riverdale Park
Rock Hall	Rockville	Salisbury
Seat Pleasant	Snow Hill	Somerset
Takoma Park	Talbot County	Taneytown
Thurmont	University Park	Walkersville
Westernport	Westminster	

## **D. Commercial and Industrial Grant Program**

*SEIF Expenditures and Encumbrances: \$2.277 million*

### *Beneficiaries*

The Commercial and Industrial (C&I) Grant Program offers financial incentives to the commercial and industrial building sector.

### *Description*

In its fourth year in FY17, the C&I Grant Program provides grants to commercial and industrial applicants to install energy efficiency measures that achieve deep reductions in total building or space electricity usage. Grants cover up to half of the total project cost after utility incentives and other leveraged funds are applied.

### *Program Accomplishments*

Some projects funded through this program have long lead times and, therefore, many are still being installed. FY17 annual savings estimates below reflect the projections of the electricity reductions that are anticipated to accrue from program-funded projects, but are subject to change. The summary report below shows anticipated total project savings, including energy savings from any energy measures that may be benefitting from other funding sources, including utility incentives.

<b>Fiscal Year</b>	<b>FY17</b>
# of grants awarded	13
Annual savings (kWh)	8,772,349

## **E. Kathleen A. P. Mathias Agricultural Energy Efficiency Program**

*SEIF Expenditures and Encumbrances: \$0.398 million*

### *Beneficiaries*

The program benefits farms and businesses in the agriculture sector.

### *Description*

The Kathleen A. P. Mathias Program was offered for the fifth time in FY17. The program is designed to highlight cost-effective energy improvements in the agriculture sector. The FY17 program focused on energy efficiency upgrades, with some funds available for renewable energy projects as well. Examples of funded projects in FY17 include insulation, lighting, and pump upgrades.

### *Program Accomplishments*

Through the program, MEA shares information on the projects, giving farms and businesses in the agriculture sector a local example of energy improvements and helping them to make informed decisions about pursuing similar upgrades on their own. A goal of the program is to highlight best practices and cost-effective retrofit opportunities in Maryland's agricultural community.

Some projects funded by FY17 grants are still being installed by grantees. The annual savings estimates shown below are based on initial audit estimates. FY17 energy savings will be finalized as part of the project close-out process once all measures are installed.

<b>Fiscal Year</b>	<b>FY17</b>
# of grants	13
Annual savings (kWh)	125,493
Estimated annual heating fuel savings (MMBTU)*	5,976

\*Note: Includes propane and coal.

## **F. Next Generation Energy Efficiency for the Industrial Sector**

***SEIF Expenditures and Encumbrances: \$0.089 million***

### *Beneficiaries*

Maryland manufacturers located within the Baltimore Gas and Electric Service territory benefit from this program.

### *Description*

Through the Customer Investment Fund (CIF) the Next Generation Energy Efficiency Gains (NGEEG) program funds training and consulting efforts that help Maryland manufacturers in the BGE service territory implement energy efficiency upgrades by compelling management and employees of the return on investment (ROI) benefits. Additionally, the program works with participants to help them access resources in the forms of grants, rebates, and other financial resources available in the State to implement energy efficiency measures. The Regional Manufacturing Institute (RMI) is the program implementer and MEA's role consists of disbursing the CIF funds while providing financial, consultation, and outreach support and oversight.

### *Program Accomplishments*

Five firms that RMI assisted during FY17 completed energy conservation measures (ECMs), with savings of 1,115 MWh and a peak demand reduction of .022 MW. These completed ECMs had pre-approved BGE Rebates of \$98,100, allowing the cumulative total of completed rebates for the program to increase to \$654,100.

## G. Game Changers Program

*SEIF Expenditures and Encumbrances: \$0.725 million*

### *Beneficiaries*

The program provides grants to businesses, non-profits, and State, local, and municipal governments and their agencies/institutions for projects in the State of Maryland.

### *Description*

Through the Game Changers program, MEA supports the deployment of innovative clean energy projects in the State of Maryland. Game Changers projects must display the potential to significantly advance the State's clean energy market using commercially available technologies in an innovative way to lower the cost of renewable energy and/or improve efficiency of renewable energy generation. The program helps Maryland remain at the forefront of the clean energy industry as it evolves.

### *Program Details*

This year, all three grant awards incorporated new renewable energy and energy storage systems. Pairing these technologies can provide economic and energy benefits including, but not limited to, providing back up power, islanding critical loads, regulating frequency, load balancing, and increasing reliability of intermittent renewable energy systems.

Two of the grant awards will establish seven "Community Resiliency Hubs" in low to moderate income (LMI) neighborhoods in Baltimore City. These hubs will provide essential emergency services to the local community in the event of a power grid failure. Once the projects are completed, Maryland will become one of the earliest known adopters to deploy this type of asset.

The third project will equip homes with a modular AC battery system, advanced whole home power switch, load management devices, and enhanced solar PV inverters. The systems will be capable of accepting automated local controls and remote dispatch controls in order to demonstrate grid reliability and resiliency benefits.

Projects awarded grant funds in FY17 are still being constructed, installed, and/or commissioned. For this reason, the summary below shows estimated project metrics and economic benefits associated with FY17 grants, which are subject to change.

<b>Fiscal Year</b>	<b>FY16</b>
# of grants	3
Renewable Energy Capacity (kW)	341
Electric Storage Power Capacity (kW)	700
Electric Storage Energy Capacity (kWh)	600

## **H. Offshore Wind Programs**

SEIF Expenditures and Encumbrances: *\$1.205 million*

Non-SEIF Expenditures and Encumbrances: *\$0.450 million\**

### *Beneficiaries*

This program provides funds to emerging businesses, non-profit organizations, and State, local, and municipal governments and their agencies/institutions.

### *Description*

The Offshore Wind Program includes the Offshore Wind Development Fund (OSWDF) and the Offshore Wind Business Development Fund (OSWBDF)\*. Respectively, these funds are used for the development of offshore wind projects and creation of an offshore wind-related business supply chain in Maryland.

The Offshore Wind Development Fund is used for phase one development of an offshore wind project, which includes environmental surveys and wind resource characterization campaigns. These type of activities help defray the costs and speed the efforts of an offshore wind energy developer to successfully navigate the Bureau of Ocean Energy Management's (BOEM) Environmental Impact Statement process, which requires submission of a Site Assessment Plan and a Construction and Operations Plan.

The Offshore Wind Business Development Fund is used to help prepare Maryland's workforce and emerging businesses, including minority owned emerging businesses, to enter the offshore wind industry.

### *Program Accomplishments*

In FY17, encumbrances from the OSWDF were used to provide ongoing funding to the Business Network for Offshore Wind (B-NOW) to continue efforts to organize Maryland businesses entering the offshore wind industry. In addition, MEA sponsored B-NOW's 2017 International Partnering Forum in Annapolis. The three-day event brought several hundred attendees to Annapolis, resulting in economic benefits to the area resulting from visiting conference attendees. The OSWDF was also used for ongoing Maryland Department of Natural Resources (DNR) and University of Maryland, Baltimore County (UMBC) research related to offshore wind, with activity focused on black sea bass displacement, passive acoustic monitoring, and Light Detection and Ranging (LIDAR) technology.

Funds from the Offshore Wind Business Development Fund were used to provide a grant to IP Subsea to modify existing autonomous surface technology (i.e., drone technology) for use in an innovative manner, in order to lower the cost of marine surveys necessary for Offshore Wind deployment.

\*Note: The Maryland Offshore Wind Energy Act of 2013 created and housed the Offshore Wind Business Development Fund within MEA, but separate from the SEIF. MEA has included expenditures from the Offshore Wind Business Development Fund in SEIF Reports in the past and is doing so again for consistency.

## **I. Community Wind**

*SEIF Expenditures and Encumbrances: \$154,440*

### *Beneficiaries*

This program benefits businesses, non-profits, and government entities across Maryland. Community wind projects are distributed wind turbines between 1 to 750 kW that benefit a local community.

### *Description*

Through the Anemometer Loan Program, MEA helps defray risk and upfront costs associated with wind speed data collection campaigns required for community wind project development. MEA owns four meteorological towers (anemometer towers), which can be deployed to collect wind speed and temperature data for interested entities across the State.

### *Program Accomplishments*

In early FY17, the refurbished towers were deployed at three new locations. The towers are typically deployed for a minimum of twelve months in order to collect a full year of wind speed and meteorological data. Towers are currently deployed at the following locations:

- Garrett County Government - 12091 Maryland Highway, Swanton MD 21561
- Garrett County Government – 13168 National Pike, Grantsville, MD 21536
- Maryland Department of Transportation – 853 Oceanic Drive, Annapolis, MD 21409

## J. Transportation

*SEIF Expenditures and Encumbrances: \$3.982 million*

Beneficiaries include homeowners, businesses, nonprofits, and State and local government entities that install alternative fuel refueling/charging infrastructure or purchase alternative fueled vehicles.

### *Description*

MEA runs incentive programs that aim to reduce petroleum use in Maryland's transportation sector while saving car owners and fleets money through reduced fuel, operations and maintenance costs. The programs work to accomplish this goal by increasing the number of alternative fueled vehicles and the amount of alternative fuel refueling/charging infrastructure in the State. These programs include:

- Electric Vehicle Supply Equipment (EVSE) Rebate Program
- Alternative Fuel Infrastructure Program (AFIP)
- Freedom Fleet Voucher Program (FFVP)

Some projects awarded grant funds in FY17 are still in progress. For this reason, the summary below shows estimated project metrics and benefits associated with FY17 grants, which are subject to change.

### *Program Accomplishments*

<b>Fiscal Year</b>	<b>FY17</b>
# of EVSE rebates issued	326
# of AFIP DC Fast charging stations/locations	37/11
# of AFIP ethanol refueling pumps/locations	33/6
# of alternative fuel vehicles awarded	164
Total estimated annual petroleum displacement	3,076,620 gallons*

\*This figure includes petroleum displacement from the FFVP and AFIP programs only.

## **K. Combined Heat and Power Grant Program**

*SEIF Expenditures and Encumbrances: \$4.016 million*

### *Beneficiaries*

The Combined Heat and Power (CHP) Grant Program encourages the implementation of CHP technologies in Maryland's critical infrastructure, such as healthcare and wastewater treatment, as well as commercial and industrial facilities, including multifamily buildings.

### *Description*

In fiscal year 2015, the Maryland Energy Administration (MEA) launched this program to encourage Combined Heat and Power development, initially targeting healthcare and publicly owned wastewater treatment facilities throughout Maryland. These two industries were selected because of the inherent requirement for enhanced electricity resiliency. In fiscal year 2016, the CHP program was expanded to include manufacturers as well as critical infrastructure facilities. In addition, the program also targeted projects that leveraged biogas or biomass as a fuel source in industrial manufacturers or critical infrastructure facilities. In fiscal year 2017, the CHP program expanded again to also include commercial and industrial facilities.

The commissioning of CHP systems will improve efficiencies, reduce greenhouse gas emissions, and can result in lower operational costs.

Fourteen CHP projects were awarded FY17 funding. Projects awarded grant funds in FY17 are still in progress. For this reason, the summary below shows estimated project metrics and benefits associated with FY17 grants, which are subject to change.

### *Program Accomplishments*

CHP projects providing over eighteen megawatts (18.3 MW) of capacity have entered into the design/implementation phase using FY17 funds. The systems are expected to be fully commissioned by July 1, 2019.

## L. Animal Waste to Energy Program

*SEIF Expenditures and Encumbrances: \$0.305 million*

### *Beneficiaries*

The Animal Waste to Energy Grant Program offers financial incentives to any Maryland entity that could benefit from the installation and production of equipment to process animal waste into electricity, while also resulting in positive impacts to the water quality of the Chesapeake Bay. The selected Baltimore County project involves a closed-looped operation leveraging both animal waste and organic food scraps.

### *Description*

The Animal Waste to Energy Grant Program resulted from the recognition that there is proven potential in converting animal waste to energy through the anaerobic digestion process. Beyond the energy benefits, the program also assists with the removal of key nutrients from the Chesapeake Bay Watershed. The projects can also result in byproducts that can be used beneficially and as a commodity.

### *Program Accomplishments*

The types of projects funded through this program have long lead times and, therefore, this project is still being installed. The annual estimates listed below reflect projections of the electricity production that is anticipated from this program-funded project, but are subject to change.

<b>Fiscal Year</b>	<b>FY17</b>
# of grants awarded	1
Annual Electricity Production (kWh) *	0.54

## M. Net Zero Schools

*SEIF Expenditures and Encumbrances: \$0.178M*

### *Beneficiaries*

The program benefits local education agencies (LEAs) constructing new public schools in the Baltimore Gas and Electric service territory. In fiscal year 2014, Howard County Public Schools and Baltimore City Public Schools both agreed to participate in this program. MEA's original intention was to construct three new NZE schools in three different school systems. Only two school districts, however, had both the requisite new school construction opportunity and interest in the Program. As such, the third NZE School was selected to be designed and built within the Baltimore City Public Schools System (BCPSS).

### *Description*

Through this Customer Investment Fund (CIF) program, three new public schools located within the BGE service territory will be designed and constructed with the goal of achieving net zero energy usage. This program will help fund the incremental cost of design and construction for the participating schools, as well as post-evaluation and showcasing once the schools are constructed and in operation.

### *Program Accomplishments*

The new Wilde Lake Middle School opened in January 2017 and is in its first full year of operation. Construction is scheduled to begin in early 2018 for the two Baltimore City schools, Graceland Park O'Donnell Heights Elementary/Middle School and Holabird Elementary/Middle School, with building construction complete and occupancy expected in August 2020.

Since new school design and construction is a multiyear process, energy savings and generation benefits do not begin to accrue until each net zero school is fully constructed and operational. While full year energy savings data is not yet available for the new Wilde Lake Middle School, installed generation capacity for the new school is known and is reported below.

<b>Fiscal Year</b>	<b>FY17</b>
# of net zero school projects*	3
kW of solar energy installed**	625 KW

\* Since the commencement of the program

\*\* Renewable energy capacity at Wilde Lake Middle School only

## **N. Data Center Energy Efficiency Grant Pilot Program**

*SEIF Expenditures and Encumbrances: \$0.743 million*

### *Beneficiaries*

The Data Center Energy Efficiency Grant Pilot Program offers financial incentives to Maryland's information technology sector. The program is open to any commercial, state/local government, or non-profit data center located, or being constructed, within the State of Maryland with an overall data floor facility size of at least 2,000 square feet.

### *Description*

Offered for the first time in FY17, the Data Center Energy Efficiency Grant Pilot program seeks innovative energy efficiency solutions to reduce electrical usage in new and existing data centers. In existing data centers, the program also aims to improve overall Power Usage Effectiveness (PUE). The program provides competitive grants to eligible data centers for energy efficiency measures that include, but are not limited to, server virtualization, air flow optimization, aisle containment, lighting controls, variable frequency drives, heating, ventilation, and air conditioning (HVAC) upgrades, and building insulation and envelope improvements.

### *Program Accomplishments*

Some projects funded through this program have long lead times and, therefore, many are still being installed. FY17 annual savings estimates below reflect the projections of the electricity reductions that are anticipated to accrue from program-funded projects, but are subject to change. The summary report below shows anticipated total project savings, including energy savings from any energy measures that may be benefitting from other funding sources, including utility incentives.

<b>Fiscal Year</b>	<b>FY17</b>
# of grants awarded	5
Anticipated Annual savings (kWh)	10,180,762

## **O. Energy Technical Support**

*SEIF Expenditures and Encumbrances: \$0.583 million*

### *Beneficiaries*

Beneficiaries include all Marylanders

### *Description*

MEA funds technical and outreach support for efforts that support the State's energy efficiency, renewable energy, and transportation initiatives and improve energy reliability and resiliency.

In FY17, some energy programs receiving support include:

- the Clean Energy Communities Low-to-Moderate Income Program;
- the Maryland Smart Energy Communities Program;
- the Commercial and Industrial Program; and,
- the Mathias Agriculture Program.

## **P. Communications and Marketing**

*SEIF Expenditures and Encumbrances: \$0.061 million*

### *Beneficiaries*

All Marylanders

### *Description*

In FY17, the funds under the Communications and Marketing budget were used to promote energy programs of the agency. MEA has increased the amount of outreach events to help support the incentives available to Maryland businesses, nonprofits and residents.

Communications and marketing activities in FY17 include:

- Sponsorship of CAPRE's Fifth Annual Washington, D.C. & Mid-Atlantic Data Center Summit to showcase MEA's first in the country, Data Center Energy Efficiency Grant Program (DCEEGP). The Mid-Atlantic has been identified as an emerging data center marketplace and promotion of DCEEGP is a valuable incentive for new revenue and jobs for the State.
- Subscription to software as a service (SaaS) media monitoring, allowing MEA to contract media research to promote agency news through direct messaging to reporters across all news outlets, including bloggers.
- Annual sponsorship with sister state agency Maryland Public Television (MPT) to enable TV spots promoting energy efficiency and MEA grants during two prime time shows, Maryland Farm and Harvest and NOVA. The viewership of MPT primetime is 2 million nightly views.
- Updating agency promotional items for outreach at events to promote State energy programs. In FY17, MEA sent teams to exhibit at the Maryland Municipal League (MML) conference, Maryland Association of Counties (MACO) conference, the spring Maryland Home and Garden Show, Mt. Ennon Greenfest, Montgomery County GreenFest, the International Offshore Wind Partnering Forum, Maryland EV (MDEV) workshops, Light City, and Ports Town Day.

## **Q. Administration**

*SEIF Expenditures and Encumbrances: \$3.386 million*

### *Beneficiaries*

All Marylanders benefit from the efforts that occur under the SEIF.

### *Description*

In addition to being a member of the Regional Greenhouse Gas Initiative, Maryland has enacted:

- a 25 percent renewable portfolio standard by 2020;
- a 2 percent annual energy efficiency goal for the State's EmPower utilities; and,
- a 40 percent reduction in greenhouse gas emissions by 2030, as enacted in 2016.

In order to help meet these goals, MEA manages and enables numerous programs and initiatives that help increase the use of renewable energy and energy efficiency technologies among every sector in the State. Funding used for administration has allowed MEA to administer the State's energy programs described throughout this report. MEA continues to design and launch new energy programs, helping to maintain its place as a national leader in energy.

### *Program Accomplishments*

While MEA's SEIF accomplishments have been well chronicled in the programs described in the previous sections, there have been many other areas of MEA focus that receive administrative resources in the form of staff time.

In its role as the State's energy policy office, MEA participates in legislative-style proceedings and cases before the Public Service Commission (PSC). Many of the issues addressed in these matters will impact the State's energy landscape either from a renewable energy or energy efficiency standpoint.

MEA represented the State's position in the Offshore Wind Renewable Energy Credit (OREC) proceedings before the PSC. In this case, the PSC awarded ORECs to two Offshore Wind developers planning to build projects off of Maryland's Atlantic coast.

Additionally, the PSC initiated Public Conference 44 (PC44), known as the Grid of the Future docket. MEA has been an active leader in PC44 which includes five distinct working groups covering the following respective topics: rate design, interconnection, energy storage, electric vehicles, and customer choice/competitive markets.

Other PSC dockets in which MEA participated include the Community Solar working group and semi-annual EmPower proceedings.

Further, during FY17 MEA staff participated in various collaborative efforts such as the Electric Vehicle Infrastructure Council, the Maryland Green Buildings Council, the Power Plant Research Program Advisory Council, the Maryland Commission on Climate Change, and the Chesapeake Bay Sub-Cabinet.

Nationally, MEA staff has participated in events organized by the National Association of State Energy Offices, National Governors Association, National Conference of State Legislators, PJM, Inc., and the Southern States Energy Board.

## **R. Maryland Clean Energy Center**

*SEIF Expenditures and Encumbrances: \$0.485 million*

*Beneficiaries*

Maryland Clean Energy Center

*Description*

Provided the Maryland Clean Energy Center with funding for operations.

*Program Accomplishments:*

The Maryland Clean Energy Center reports the following FY17 accomplishments:

- **Maryland Property Assessed Clean Energy (MD-PACE):** MD-PACE is administered through a partnership with Pace Financial Servicing, LLC and requires an enabling ordinance at the local level. MCEC worked with several counties and Baltimore City to facilitate the process of enacting local enabling ordinances. The number of participating contractors has increased to 53 and the number of eligible capital providers enrolled is now 11, compared to 23 and 5 respectively in FY16.
- **Qualified Energy Conservation Bonds:** MCEC and its partner, Clean Source Capital, have been working cooperatively with MEA to promote the availability of QECBs to help reduce the cost of capital for project developers, and undertaking efforts to aggregate the remaining available bond allocations so they can be more expeditiously and efficiently utilized in and for Maryland. It should be noted that The Tax cuts and Jobs Act of 2017 passed late in December 2017, beyond the end of FY17, terminates the QECB program as of December 31, 2017.

## NON-MEA PROGRAMS

### S. Department of Human Services- Office of Home Energy Programs

SEIF FY17 Expenditures: \$38.682 million

#### Beneficiaries

The Office of Home Energy Programs(OHEP) within the Maryland Department of Human Services (DHS) used SEIF to provide electric utility payment assistance to eligible low-income households. Program eligibility requires the applicant household to be a resident of Maryland, have income equal or less than 175% of the Federal Poverty Level, and agree to use utility budget billing. The applicant must also have an electric bill in their name.

#### Description

SEIF funds are used for Electric Universal Service Program (EUSP) Bill Assistance and Arrearage Retirement Assistance Program benefits. Bill payment assistance benefits help make ongoing electric bills more affordable by paying a portion of a household's monthly bill. Benefit amounts are based on electric usage, household size, and income. Funds generated through the EUSP utility ratepayer service charge provide most of the funding for Bill Assistance, with SEIF used when ratepayer funds are exhausted.

Arrearage Retirement Assistance retires past due bills, up to a maximum amount of \$2,000. An arrearage benefit is generally available once per applicant every seven years. Benefits are paid directly to electric utilities on behalf of the program applicant.

#### Program Accomplishments

By preventing and resolving utility disconnections that may result in life-threatening health and safety concerns or result in households becoming homeless, bill assistance grants keep bills at an affordable level to prevent customers from experiencing a utility crisis.

<b>FY17</b> (as of June 30, 2017)	<b>Households Served</b>	<b>Total Benefits Paid</b>	<b>SEIF Benefits Paid</b>
Bill Assistance	96,434	\$48,753,805	\$17,799,433
Arrearage Retirement Assistance	14,888	\$13,580,975	\$13,580,975
<b>Total Benefit</b>	96,434*	\$62,334,780	\$31,380,408

\* Note: Arrearage recipients are a sub-set of EUSP Bill Assistance recipients.

During FY17, OHEP developed a new initiative focused on incentivizing energy conservation and education through supplemental bill payment assistance and discouraging recurring accrual of past due arrearages. The result is the Supplemental Targeted Energy Program (STEP), which OHEP expects to be in operation by July 2018.

**T. Department of Housing and Community Development (DHCD)- Multifamily Energy Efficiency and Housing Affordability (MEEHA) Program**

*SEIF FY17 Encumbrances: \$ 4.625 million*

*Beneficiaries*

During FY17, DHCD reports committing SEIF funds through the MEEHA program to eight affordable multifamily housing developments consisting of 1,454 residential units.

*Description*

DHCD is using SEIF funds to provide MEEHA services to customers located in the Potomac Edison and PEPCO utility service territories. The funds are used to make loans and grants for the purchase and installation of cost effective energy conservation measures in affordable multifamily properties. These improvements are intended to reduce the multifamily building's energy use and lower utility bills for occupants and owners.

*Program Accomplishments*

Through the use of SEIF funds, DHCD reports the following accomplishments:

<b>Fiscal Year</b>	<b>FY17</b>
# of multifamily developments participating in MEEHA	8
# of multifamily buildings being upgraded	64
# of individual residential units contained in the MEEHA multifamily developments	1,454
Anticipated annual electricity savings once projects are completed (kWh/year)	4,356,978
Anticipated annual fuel savings, once projects are completed (therms/year)	50,267
Average savings to investment ratio	1.74

## U. Department of Housing and Community Development (DHCD) – Energy Efficient Homes Construction Loan Program

SEIF FY17 Transfers: \$1.400 million

### *Beneficiaries*

This program transfers funds from the SEIF to seed the Department of Housing and Community Development (DHCD) Energy Efficient Homes Construction Loan Fund. In this way, the direct beneficiary is DHCD’s Energy Efficient Homes Construction Loan Program.

DHCD reports that the Home Energy Efficient Construction Loan Program, frequently referred to as the Net Zero Homes Program, has provided funds to one multifamily project in FY17. This project will be the future home for at-risk or homeless veterans and their families.

### *Description*

The FY17 project consists of 42 single-family style homes being converted into 66 stacked duplex and 9 single-family net zero energy homes. The renovation will be a comprehensive retrofit encompassing many aspects of the building shell, thermal barrier, appliances, lighting, heating and cooling equipment, and a solar photovoltaic array. Measures funded through SEIF include:

- Solar Photovoltaic Array (451 kW)
- LED lighting
- Exterior Insulated Doors
- High Efficiency Water Heaters
- Mini-Split Heat Pumps

### *Program Accomplishments*

Through the use of SEIF funds, DHCD reports the following will be accomplished once the project is fully constructed:

<b>Fiscal Year</b>	<b>FY17</b>
Estimated avoided annual electricity use (not including solar production) in kWh/year	231,408
Solar PV array size (kW)	451
Estimated solar photovoltaic production in kWh/year	602,076

**V. Department of Housing and Community Development – Department of Energy Weatherization Assistance Program**

*SEIF FY17 Expenditures: \$0.184 million*

*Beneficiaries*

SEIF funds allocated to the Department of Energy Weatherization Assistance Program (DOE WAP) significantly benefit low income Marylanders by enabling additional energy efficiency and health and safety measures to be completed over and above what DOE WAP's limits allow.

*Description*

DHCD reports that SEIF funds enabled 63 single family homes to receive benefits through the program. The SEIF funding was used for energy savings measures including insulation and heating, ventilation, and air conditioning (HVAC) replacement, as well as health and safety issues, such as a moisture problem, that could prevent a home from being able to be assisted by the DOE WAP program. SEIF funds enabled the DOE WAP to stretch its federal funding further, resulting in more homes being assisted, including some homes that may not have otherwise been able to participate due to the cost cap of the DOE WAP program.

*Program Accomplishments*

Through the use of SEIF funds, the following accomplishments occurred:

<b>Fiscal Year</b>	<b>FY17</b>
# of single family households assisted	63
Amount of leveraged DOE WAP funding	\$262,544.84
Estimated annual electricity savings for completed projects (kWh/year)	114,257
Estimated annual therms of natural gas saved for completed projects	8,912
Estimated annual MMBTU of fuel oil and propane saved for completed projects	471.96
Homes receiving an HVAC replacement as part of the upgrade	22

## **W. Maryland Department of the Environment (MDE) – Climate Change Program**

*SEIF FY17 Expenditures and Encumbrances: \$3.019M*

### *Program Beneficiaries and Participants*

SEIF provides funding for staffing and operations in the Air Quality Planning Program, Mobile Source Program, Compliance Program, Permits Program, Air Monitoring Program, and Legal Program. Further expenditures funded by SEIF include contractual assistance for tasks beyond the expertise of the staff, such as economic analyses and, additional resources to assist in implementing the Greenhouse Gas Emissions Reduction Act of 2016.

Funds also support Maryland’s involvement with the Regional Greenhouse Gas Initiative (RGGI), the regional organization that assists the nine member states with the operational aspects of the RGGI program. Member states are required to pay dues to RGGI, Inc. for their share of the operational costs of the auction platform for the cap and invest program that generates the SEIF funds, as well as for other implementation costs.

### ***Program Accomplishments***

#### RGGI 2016 Program Review

On August 23, 2017, after completing a comprehensive 1.5 year review, Maryland and the other RGGI participating states announced a consensus agreement on proposed program changes. A regional emissions cap trajectory is proposed that will provide an additional 30 percent cap reduction by the year 2030, along with important new features and innovations including an Emissions Containment Reserve (ECR) and a Cost Containment Reserve (CCR).

#### NESCAUM Multi-State Zero Emission Vehicle (ZEV) Implementation Task Force

Northeast States for Coordinated Air Use Management (NESCAUM) is a nonprofit association of air quality agencies in the Northeast to assist member states in implementing national environmental programs required under the Clean Air Act and other federal legislation. MDE contracted with NESCAUM to facilitate the work of the Multi-State Zero Emission Vehicle (ZEV) Implementation Task Force. NESCAUM was tasked with coordinating and facilitating ZEV Implementation Task Force conference calls and in-person meetings, coordinating and facilitating stakeholder coordination, coordinating technical and policy analyses for Maryland, supporting California Air Resources Board (CARB) efforts to develop and maintain web-based Credit Tracking tool, and drafting reports, white papers, and meeting materials, including overseeing graphic design and printing.

## **X. Maryland Department of the Environment – Energy-Water Infrastructure Program**

SEIF FY17 Expenditures and Encumbrances: *\$4.000 million*

### *Beneficiaries*

Maryland water and waste water treatment plant owners were eligible to apply for this program. MDE reports that eleven Maryland jurisdictions had projects allocated funding in FY17. Of those, two awards were made in FY17 totaling \$4 million.

### *Description*

The Energy-Water Infrastructure Program (e-WIP) provides capital grant funds to water and wastewater treatment plant owners to develop energy efficient and resilient projects, including combined heat and power systems and other alternative or green energy sources, and for replacement of aging equipment with newer, more energy efficient technologies. There are two focus areas:

1. Promote onsite waste to energy power generation by commissioning new combined heat and power systems or other alternative/green energy sources.
2. Upgrade/replace aging pumps and process equipment with more efficient units.

Projects will benefit both the environmental and economic interests of the State by utilizing renewable and clean energy resources, reducing or mitigating climate change effects, promoting beneficial changes in electricity generation and usage at water and wastewater facilities, and supporting resiliency and sustainability.

### *Program Accomplishments*

- One million dollars (\$1,000,000) was encumbered to Anne Arundel County for the Energy Efficient Belt Filter Presses project. The project involves the purchase of eight high-efficiency belt filter presses for solids/sludge dewatering at three Anne Arundel County wastewater treatment plants: Annapolis, Broadneck, and Patuxent. Use of these presses is expected to reduce electric consumption by 51 percent, as compared to the presses currently being used at these facilities.
- Three million dollars (\$3,000,000) was encumbered to Easton Utilities Commission for the Easton Wastewater Treatment Plant Photovoltaic Array project in Talbot County. The project entails construction of a photovoltaic power generation system at Easton Wastewater Treatment Plant (WWTP). The system is designed to generate approximately 2,896,000 kWh/year of renewable energy with the goal to fully cover the energy demand at the WWTP. The system will be interconnected to the electric power grid and net-metered against the WWTP's electricity consumption in order to ensure reliable and consistent energy supply to the facility.

## Y. Electric Vehicle Excise Tax Credit

*SEIF Reimbursement: \$1.287 million*

### *Beneficiaries*

Anyone who registers a new electric vehicle (EV) in the State of Maryland is eligible for the tax credit, up to available funding levels.

### *Description*

In 2010, the Maryland General Assembly passed a credit against the motor vehicle excise tax for certain qualified plug-in electric drive vehicles. This was a three year program and each vehicle was eligible for up to \$2,000. In 2013, the legislature extended the statute by one year and changed the incentives to be tiered based on vehicle kWh battery capacity. In 2014, the legislature extended the statute by 3 years and changed the tiered system to a flat \$125/kWh of battery capacity up to \$3,000.

SEIF funds were used to reimburse the State Treasury for electric vehicle excise tax credits claimed during tax year 2016.

### *Program Accomplishments*

To provide the most recent program results, the activity described below reflects activity from FY17 rather than historical activity from calendar year 2016 reimbursed in FY17.

<b>Fiscal Year</b>	<b>FY17</b>
# of tax credits*	699
Sum of tax credits funded by SEIF	\$1,287,000
Total sum of tax credits issued*	\$1,799,750
Annual savings (Gasoline Gallon Equivalents (GGE))**	257,979

\*Some credits are paid by MDOT.

\*\*In previous SEIF reports, GGE was reported over the entire estimated eight-year life of the battery. GGE is now being reported on an annual basis.

Note: Tax credit information provided by the Motor Vehicle Administration.

## **Z. Department of General Services**

*SEIF FY17 Expenditures and Encumbrances: \$1.436 million*

### *Beneficiaries*

SEIF funds limited staffing and operations in the Department of General Services (DGS) Energy Office. State agencies and Maryland taxpayers benefit from this program. The SEIF funding supports DGS Energy Office efforts to provide professional and technical services to reduce state agency energy consumption through state agency energy planning; energy performance contracting and energy use tracking.

### *Program Accomplishments*

Through this program, DGS accomplished the following:

- DGS updated state agency energy plans to help the State achieve its energy performance standards. State agencies work with the DGS Energy Office to produce an Agency Energy Plan that identifies energy consuming equipment and recommends energy conservation measures and climate mitigation strategies with the greatest potential for energy savings. The framework of the plan encompasses renewable energy technology, system reliability, sustainability, economic development, environmental quality, and energy security. It further incorporates fuel demand, supply, and price characteristics.
- DGS continues to educate and encourage State Agency decision-makers to use the opportunities, incentives and financing available to retrofit small and medium-sized State buildings, structures, and facilities by engaging in energy performance contracting projects. The DGS Energy Office provides guidance and technical expertise to enable State Agencies to create and implement Energy Performance Contracts (EPC) to significantly reduce energy and operating costs and make progress toward meeting sustainability and system reliability goals. The DGS Energy Office ensures that system reliability goals and energy savings are achieved through a stringent measurement and verification process.

**AA. Department of Health State Energy Loan Repayments**

*SEIF Expenditure and Encumbrances: \$2.614 million*

*Beneficiaries*

State agencies benefit from this program.

*Description*

In Maryland, general funds normally pay for state agencies' energy bills. To lower those bills, many state agencies are currently participating in energy performance contracts (EPCs). EPCs are intended to be self-funded; a participant would take out loans to pay for energy improvements through the EPC and the annual energy savings from those improvements are guaranteed to be more than enough to repay those loans. However, instead of using the energy savings to repay the loans, the State has chosen to use SEIF funds to repay the Department of Health loans, thereby freeing up general funds to address other needs in the State budget.

## APPENDIX A: SEIF Funding Details

SEIF Revenues by Source			
Source	FY2015	FY2016	FY2017
Regional Greenhouse Gas Initiative Auction Revenue:	\$ 70,897,429	\$ 84,293,946	\$ 40,827,457
RGGI Set Aside Allowances Revenue:	\$ -	\$ 3,280,000	\$ 3,360,000

## APPENDIX B: FY17 Grantees Receiving Multiple SEIF Awards

Appendix B contains a summary of individuals and/or addresses identified by MEA as receiving multiple awards from the Strategic Energy Investment Fund in FY17.

There are several ways that non-profit organizations, local governments, and businesses can be eligible for multiple awards in a given fiscal year from the Strategic Energy Investment Fund. A list of entities receiving multiple awards in FY17 can be found in Table 1 below. Examples of ways that an entity can receive multiple awards include:

- A portion of the Clean Energy Communities low-to-moderate income program is offered on a county-by-county basis to ensure geographical diversity. In this way, a non-profit organization that wishes to implement projects in several counties could submit applications in each county, resulting in the possibility of multiple awards.
- The Transportation program’s commercial Electric Vehicle Supply Equipment rebates allows commercial entities to be eligible to receive multiple awards if multiple stations have been installed.
- Entities can opt to participate in more than one energy program. Several counties and local governments participate in multiple MEA energy efficiency programs.

**Table 1: Non-residential Entities Receiving Multiple SEIF Awards in FY17**

Program	Award Name	Amount
Electric Vehicle Supply Equipment Rebate Program	Frederick County- TransIT Services	\$ 8,061
Clean Energy Communities Low-To-Moderate Income Grant Program	Arundel Community Development Services	\$ 200,000
Clean Energy Communities Low-To-Moderate Income Grant Program	Arundel Community Development Services	\$ 750,000
Freedom Fleet Voucher Program	AutoPort, Inc for Advanced Comfort Systems	\$ 5,000
Freedom Fleet Voucher Program	AutoPort, Inc for Advanced Comfort Systems	\$ 5,000
Freedom Fleet Voucher Program	AutoPort, Inc for Sharp Gas	\$ 12,000
Freedom Fleet Voucher Program	AutoPort, Inc. for Advanced Comfort Systems	\$ 10,000
Game Changer Program	Baltimore City	\$ 250,000
Maryland Smart Energy Communities	Baltimore City	\$ 132,000
Combined Heat and Power	Baltimore City	\$ 11,500

Clean Energy Communities Low-To-Moderate Income Grant Program	Baltimore City	\$	382,393

Clean Energy Communities Low-To-Moderate Income Grant Program	SAFE Housing	\$	96,200
Clean Energy Communities Low-To-Moderate Income Grant Program	SAFE Housing	\$	500,000
Clean Energy Communities Low-To-Moderate Income Grant Program	SHORE UP!	\$	25,000
Clean Energy Communities Low-To-Moderate Income Grant Program	SHORE UP!	\$	50,000
Clean Energy Communities Low-To-Moderate Income Grant Program	SHORE UP!	\$	65,000

Clean Energy Communities Low-To-Moderate Income Grant Program	SHORE UP!	\$	25,000
Clean Energy Communities Low-To-Moderate Income Grant Program	Today's Dream Tomorrow's Future	\$	100,000
Clean Energy Communities Low-To-Moderate Income Grant Program	Today's Dream Tomorrow's Future	\$	100,000
Clean Energy Communities Low-To-Moderate Income Grant Program	Today's Dream Tomorrow's Future	\$	50,000
Clean Energy Communities Low-To-Moderate Income Grant Program	Today's Dream Tomorrow's Future	\$	100,000
Clean Energy Communities Low-To-Moderate Income Grant Program	Today's Dream Tomorrow's Future	\$	100,000
Clean Energy Communities Low-To-Moderate Income Grant Program	Town of Edmonston	\$	81,474
Maryland Smart Energy Communities	Town of Edmonston	\$	16,275
Clean Energy Communities Low-To-Moderate Income Grant Program	Tuckahoe Habitat for Humanity	\$	50,000
Clean Energy Communities Low-To-Moderate Income Grant Program	Tuckahoe Habitat for Humanity	\$	50,000
PV in Parking Lots Grants Program	University of Maryland Center for Environmental Science	\$	43,000
Electric Vehicle Supply Equipment Rebate Program	University of Maryland Center for Environmental Science	\$	3,145
Combined Heat and Power	University of Maryland Institute for Bioscience and Biotechnology Research	\$	118,125
PV in Parking Lots Grants Program	University of Maryland Institute for Bioscience and Biotechnology Research	\$	75,000
Freedom Fleet Voucher Program	XL Hybrids for Montgomery County	\$	10,990
Freedom Fleet Voucher Program	XL Hybrids for Montgomery County	\$	32,970

As an individual, one way that it is possible to receive multiple awards from the Strategic Energy Investment Fund is by participating in the Clean Energy Grant Program after installing more than one renewable energy technology. Another potential way is to participate in the Clean Energy Grant Program in conjunction with the Electric Vehicle Supply Equipment rebate program, which provides financial incentives for electric vehicle charging equipment. In FY17, MEA has identified forty individuals corresponding to thirty-three addresses who have received multiple awards from the Strategic Energy Investment Fund. A list of the individuals who individually received multiple awards, or whose address received multiple awards, is shown below in Table 2.

**Table 2: Individuals who have received (or whose address has received) multiple SEIF awards in FY17**

Program	Award Name	Amount
Residential Clean Energy Grant Program	Allston, Kenneth	\$ 500
Residential Clean Energy Grant Program	Allston, Kenneth	\$ 3,000
Residential Clean Energy Grant Program	Bailey, Sharon	\$ 1,000
Residential Clean Energy Grant Program	Berberian Archie	\$ 1,000
Residential Clean Energy Grant Program	Berberian, Archie	\$ 1,000
Electric Vehicle Supply Equipment Rebate Program	Blackowitz, Frank	\$ 900
Residential Clean Energy Grant Program	Blackowitz, Frank	\$ 1,000
Residential Clean Energy Grant Program	Blackowitz, Frank	\$ 3,000
Residential Clean Energy Grant Program	Borns, Michael	\$ 1,000
Residential Clean Energy Grant Program	Borns, Michael	\$ 500
Residential Clean Energy Grant Program	Cann, Stanley	\$ 1,000
Residential Clean Energy Grant Program	Cann, Stanley	\$ 500
Residential Clean Energy Grant Program	Corkum, Melissa	\$ 500
Residential Clean Energy Grant Program	Corkum, Patrick	\$ 1,000
Residential Clean Energy Grant Program	Daniels, Kerry	\$ 1,000
Residential Clean Energy Grant Program	Daniels, Kerry	\$ 700
Residential Clean Energy Grant Program	Dellone, Gary	\$ 1,000
Residential Clean Energy Grant Program	Dellone, Gary	\$ 500
Residential Clean Energy Grant Program	Dorsey, Rachel	\$ 700
Residential Clean Energy Grant Program	Dorsey, Rachel	\$ 3,000
Residential Clean Energy Grant Program	Finter, Jennifer	\$ 500
Residential Clean Energy Grant Program	Finter, Jennifer	\$ 700
Residential Clean Energy Grant Program	Frounfelker, Bradley	\$ 1,000
Residential Clean Energy Grant Program	Frounfelker, Bradley	\$ 3,000
Residential Clean Energy Grant Program	Gede, James	\$ 500
Electric Vehicle Supply Equipment Rebate Program	Han, Brian	\$ 462
Residential Clean Energy Grant Program	Han, Brian	\$ 1,000
Residential Clean Energy Grant Program	Hayes, Robert	\$ 1,000

Residential Clean Energy Grant Program	Hayes, Robert	\$ 3,000
Electric Vehicle Supply Equipment Rebate Program	Kaiyoorawongs, Molley	\$ 900
Residential Clean Energy Grant Program	Kaiyoorawongs, Molley	\$ 1,000
Residential Clean Energy Grant Program	Kesseboom, Nicola	\$ 1,000
Electric Vehicle Supply Equipment Rebate Program	Kesseboom, Stephan	\$ 265
Electric Vehicle Supply Equipment Rebate Program	Liem, Alvin	\$ 352
Residential Clean Energy Grant Program	Liem, Alvin	\$ 1,000
Residential Clean Energy Grant Program	Loper, Ian	\$ 1,000
Residential Clean Energy Grant Program	Loper, Ian	\$ 3,000
Electric Vehicle Supply Equipment Rebate Program	Lukas, Jason	\$ 598
Electric Vehicle Supply Equipment Rebate Program	Lukas, Maria	\$ 598
Electric Vehicle Supply Equipment Rebate Program	Maheshwary, Anurag	\$ 750
Electric Vehicle Supply Equipment Rebate Program	Maheshwary, Charu	\$ 750
Residential Clean Energy Grant Program	Mead, Robert	\$ 1,000
Residential Clean Energy Grant Program	Mead, Robert	\$ 3,000
Residential Clean Energy Grant Program	Morgan, Grayson	\$ 1,000
Residential Clean Energy Grant Program	Morgan, Grayson	\$ 500
Residential Clean Energy Grant Program	Neill, Gerald	\$ 1,000
Residential Clean Energy Grant Program	Neill, Gerald	\$ 500
Electric Vehicle Supply Equipment Rebate Program	Schechter, Joseph	\$ 717
Residential Clean Energy Grant Program	Schechter, Joseph	\$ 1,000
Residential Clean Energy Grant Program	Siegel, Nathan	\$ 3,000
Residential Clean Energy Grant Program	Siegel, Nathan	\$ 1,000
Residential Clean Energy Grant Program	Smeltzer, Patricia	\$ 1,000
Residential Clean Energy Grant Program	Smeltzer, Patricia	\$ 500
Residential Clean Energy Grant Program	Steffy, Jared	\$ 1,000
Residential Clean Energy Grant Program	Steffy, Jared	\$ 500
Residential Clean Energy Grant Program	Su, Sam	\$ 3,000
Electric Vehicle Supply Equipment Rebate Program	Su, Samuel	\$ 900
Residential Clean Energy Grant Program	Su, Samuel	\$ 1,000
Residential Clean Energy Grant Program	Tyler, Carl	\$ 700
Residential Clean Energy Grant Program	Tyler, Lindsay	\$ 3,000
Electric Vehicle Supply Equipment Rebate Program	Vashist, Alpa	\$ 741

Electric Vehicle Supply Equipment Rebate Program	Vashist, Sudhir	\$ 741
Residential Clean Energy Grant Program	Wonsever, Josef	\$ 1,000
Residential Clean Energy Grant Program	Wonsever, Josef	\$ 3,000
Residential Clean Energy Grant Program	Yeager, Traci	\$ 500
Residential Clean Energy Grant Program	Yeager, Traci	\$ 700
Residential Clean Energy Grant Program	Zhang, Jiangyue	\$ 1,000
Residential Clean Energy Grant Program	Zhang, Jiangyue	\$ 500

## Appendix C: FY17 Grantees

The following pages contain a list of more than 3,400 grant awards issued by the Maryland Energy Administration in FY17. Awards are organized first by program, using the program order shown in the Table of Contents, and then alphabetically within each individual program. To further aid in the navigation of Appendix C, each award is preceded by the name of the program and the letter assigned to the program in the Table of Contents.

The FY17 program with the largest number of participants by far is the Residential Clean Energy Grant Program. A list of incentives, by technology, for this program in FY17 is shown below for reference.

**Table 3: Residential Clean Energy Grant Program Incentives by Technology**

Technology	Award
Solar Photovoltaics (PV)	\$1,000/project
Solar Water Heating (SWH)	\$500/project
Geothermal Heating & Cooling (GHC)	\$3,000/project
Geothermal Heating & Cooling (GHC) replacement	\$500/project
Wind	\$3,000 per kW of normalized capacity
Stick (wood) Burning Stove	\$500/installation
Pellet Burning Stove	\$700/installation

For brevity, the following programs will be abbreviated as follows in Table 4 below:

- The Residential Clean Energy Grant Program will be abbreviated to Residential CEGP.
- The Commercial Clean Energy Grant Program will be abbreviated to Commercial CEGP.
- The Electric Vehicle Supply Equipment Rebate Program will be abbreviated to EVSE Rebate Program.

**Table 4: FY17 Grantees**

<b>Program Letter</b>	<b>Program Name</b>	<b>MEA Award Name</b>	<b>Award Amount</b>
A	Clean Energy Communities Low-To-Moderate Income Grant Program	Arundel Community Development Services	\$200,000
A	Clean Energy Communities Low-To-Moderate Income Grant Program	Arundel Community Development Services	\$750,000
A	Clean Energy Communities Low-To-Moderate Income Grant Program	Baltimore City	\$382,393
A	Clean Energy Communities Low-To-Moderate Income Grant Program	Choptank Electric Cooperative	\$250,000
A	Clean Energy Communities Low-To-Moderate Income Grant Program	City of Fredrick	\$170,000
A	Clean Energy Communities Low-To-Moderate Income Grant Program	City of Takoma Park	\$90,000
A	Clean Energy Communities Low-To-Moderate Income Grant Program	Civic Works, Inc	\$200,000
