

# Maryland Strategic Energy Investment Fund

## Report on Fund Activities Fiscal Year 2018

*prepared by the*

**Maryland**  
Energy  
Administration

## Table of Contents

Introduction

### MEA Programs

- A. Clean Energy Communities Low-to-Moderate Income Grant Program
- B. Clean Energy Grant Programs
- C. Community Solar
- D. Maryland Smart Energy Communities
- E. Commercial and Industrial Grant Program
- F. Kathleen A. P. Mathias Agricultural Energy Efficiency Program
- G. Next Generation Energy Efficiency Gains for the Industrial Sector
- H. Offshore Wind Development Program
- I. Community Wind
- J. Transportation Programs
- K. Combined Heat and Power (CHP) Program
- L. Animal Waste-to-Energy Program
- M. Net Zero Energy Schools
- N. Data Center Energy Efficiency Program
- O. Community College Energy Efficiency Pilot Program
- P. Energy Technical Support
- Q. Communications and Marketing
- R. Administration

### Non-MEA Programs

- S. Department of Human Services Energy Universal Service Program Bill Payment
- T. Department of Housing and Community Development Energy Efficient Homes Construction Loan Fund Program
- U. Department of Housing and Community Development Weatherization Program
- V. Maryland Department of the Environment Climate Change Programs
- W. Maryland Department of the Environment Energy-Water Infrastructure Program
- X. Motor Vehicle Administration Electric Vehicle Excise Tax Credit
- Y. Department of General Services
- Z. Department of Licensing, Labor and Regulation Maryland Green Jobs Initiative
- AA. Maryland Department of Agriculture
- BB. Maryland Energy Innovation Institute
- CC. Department of Health Energy Performance Contracting (EPC) Repayments

SEIF Planning

Appendix A: SEIF Funding Details

Appendix B: FY18 Awardees receiving multiple awards

Appendix C: FY18 Awardees

## INTRODUCTION

Pursuant to Section 9-20B-12 of the State Government Article, the Maryland Energy Administration (MEA) is required to prepare an annual report to the Governor and General Assembly. This report, among other things, describes the expenditures of the Strategic Energy Investment Fund (SEIF); grants awarded; energy savings estimated; and programs, projects and activities conducted. The data in this report demonstrates achievements being made towards promoting affordable, reliable, and cleaner energy for the benefit of all Marylanders.

On behalf of the State, MEA implements its charge through innovative and effective policies, programs, technologies, and financing mechanisms using funds from the SEIF. These programs help reduce energy bills, address global climate change concerns, create jobs, attract and retain business, and promote energy independence. In addition to MEA-directed programs, funds from the SEIF are allocated to a variety of other state agencies that also work to achieve energy and climate-related goals.

A breakdown of the FY18 SEIF allocations across all State agencies from all funding sources is provided in the pie Chart 1 directly below.

**Chart 1: FY18 Overall SEIF Allocations<sup>1</sup>**

The SEIF is comprised of a variety of funding sources. The main source of proceeds is historically from Regional Greenhouse Gas Initiative (RGGI) auctions. However, in recent years non-RGGI funds sources have been representing an increasing percentage of the overall SEIF. In FY18, the SEIF includes income from RGGI auctions, the Exelon-Constellation/Pepco merger settlements (including the Offshore Wind Development Account, Tier 1 Alternative Compliance Payment (ACP), Customer Investment Fund (CIF), and Pepco Most Favored Nation (MFN)), other Public Service Commission (PSC) orders,

<sup>1</sup> Due to delays in fiscal year accounting close out, funds will be transferred to MDE to support RGGI Inc. dues and climate change efforts during FY19.

Alternative Compliance Payments from entities that are required to comply with the State's Renewable Portfolio Standard, and a few other minor sources of funds. Appendix A details each source for each amount received by the fund, along with a detailed accounting of disbursements from the fund. This appendix also includes details on RGGI auctions, including the number of allowances sold, allowance prices, and estimated future revenues.

Details describing activities funded through the SEIF are provided in the narratives and charts that follow. Appendix B provides a list of FY18 grantees receiving multiple SEIF-funded awards from MEA, while Appendix C depicts SEIF allocations to FY18 grantees. In addition, MEA annually provides a report on all disbursements over \$25,000 to the Department of Budget and Management (DBM), which publishes the data on its Funding Accountability website.

In FY18, SEIF funded several new energy initiatives. The Maryland Department of Licensing, Labor, and Regulation (DLLR) received funding to implement the EARN Maryland Green Jobs Initiative. As statutorily required, the Maryland Energy Innovation Institute (MEII) at the University of Maryland received SEIF funding into the Maryland Energy Innovation Fund.<sup>2</sup> Within MEA, a new program was launched that provided incentives to help enable Maryland residents to participate in the Community Solar pilot program being overseen by the Maryland Public Service Commission. Finally, MEA launched a pilot program focusing on helping community colleges improve energy efficiency on their campuses. Additional details about each of these new programs is contained in this report.

---

<sup>2</sup> Section 3 of Chapter 365 of the Acts of the General Assembly of 2017.

## MEA PROGRAMS

### A. Clean Energy Communities Low-to-Moderate Income Grant Program

*SEIF Expenditures and Encumbrances: \$4.817 million*

#### *Beneficiaries*

Non-profits and local governments can receive funding from this program to implement energy efficiency measures that benefit low-to-moderate income Marylanders. Past awardees include non-profits organizations, community action agencies, housing authorities, and county and local governments.

#### *Description*

Grants were awarded to projects that generate significant energy savings through energy efficiency, with the benefits of the energy savings being passed on to Maryland's low-to-moderate income residents. Priority was given to projects that maximize energy savings and the number of low-to-moderate income residents that benefit from the measures. Through FY14, MEA allocated grant funds to each county formulaically based on population and income levels. Applications were then evaluated competitively on a county-by-county basis, ensuring a fair distribution of funds across the State. Starting in FY14, the program was expanded to include a statewide competition for larger projects that can help buildings or communities take advantage of economies of scale. Past projects include residential whole building upgrades and energy efficiency improvements to homeless shelters.

FY18 projects are still being installed. For this reason, the anticipated total estimates for FY18 are based on results from previous fiscal years. Some energy measures may be benefitting from other funding sources.

#### *Program Accomplishments*

<b>Fiscal Year</b>	<b>FY18</b>
# of FY18 grants issued	45
Anticipated annual kWh savings	2,745,000
Anticipated annual fuel savings (MMBTU) <sup>3</sup>	8,500

---

<sup>3</sup> May include natural gas, propane, or #2 fuel oil.

## B. Clean Energy Grant Program

*SEIF Expenditures and Encumbrances: \$4.026 million*

### *Beneficiaries*

Beneficiaries include homeowners, businesses, nonprofits, and State and local government entities that install eligible renewable energy systems.

### *Description*

MEA's Clean Energy Grant Program (CEGP) was designed to support renewable energy installations across the State of Maryland. From inception, the Clean Energy Grant Program provided incentives for solar photovoltaic, solar water heating, geothermal heating and cooling, and wind energy systems. Wood and pellet stoves were later added as eligible technologies. Beginning in FY14, the program also included incentives for commercial-scale solar photovoltaic canopy systems that include charging for electric vehicles.

Residential incentive levels are set at a fixed amount while commercial incentive levels are established based on the size and type of the renewable energy system. The number of grants processed as part of the CEGP program highlights the popularity of the program.

Some of the FY18 commercial projects are still underway. Generation and capacity estimates for these projects are included in program details below, but are subject to change.

### *Program Accomplishments*

<b>Fiscal Year</b>	<b>FY18</b>
Total # of grants	2,701
Estimated new electricity generated <u>or</u> avoided that is incentivized by the CEGP program (kWh/year)	30,029,235
Estimated MMBTU/year avoided due to projects receiving CEGP program incentives	7,748
Overall Solar PV (kW)	23,151
Solar Thermal (SF)	2,686
Capacity of new Geothermal installed (Ton)	573
Wood and Pellet Stove capacity (btu/hr)	23,104,469
Solar PV Canopy (kW) <sup>4</sup>	3,665
Wind (kW)	0

---

<sup>4</sup> While Solar PV Canopy Capacity is called out separately in the chart above, it is also included in the Overall Solar PV metric.

## C. Community Solar

**\*\*THIS IS A NEW PROGRAM OFFERED FOR THE FIRST TIME IN FY18.\*\***

*SEIF Expenditures and Encumbrances: \$3.082 million*

### *Beneficiaries*

Community Solar incentives in FY18 went to:

1. subscriber organizations developing low-to-moderate income (LMI) Community Solar projects; and,
2. a non-profit entity providing a loan loss reserve for projects targeted to LMI subscribers.

The ultimate beneficiaries of MEA's Community Solar program are LMI Maryland residents who are now more likely and able to participate in a Community Solar pilot project.

### *Description*

Community solar allows Maryland residents to purchase subscriptions for electricity produced from local community solar arrays, thereby gaining some of the same economic advantages as having solar modules directly on a residence while avoiding possible obstacles to participation in solar that may exist (e.g., roof age, property ownership, roof orientation, or shading). The Community Solar incentives offered by MEA in FY18 were designed to help enable LMI and non-LMI Marylanders to participate in the Community Solar Pilot being overseen by the Maryland Public Service Commission (PSC).

In FY18, two types of Community Solar awards were made. The first incentive was offered to subscriber organizations developing individual community solar arrays to enable them to offer terms and conditions in their Subscription Agreements (i.e., a contract to participate in a community solar project) that would maximize cost savings and minimize the contract period for LMI subscribers. The second incentive established a loss reserve fund that can be used to mitigate cash flow risk of late or nonpayment for Community Solar projects committed to having at least 30% of the array electricity go to LMI subscribers. In addition, MEA also made incentives available for non-LMI participants under an ownership model; however, MEA received no applications involving an ownership model.<sup>5</sup>

FY18 projects are still being developed and are not yet installed. Generation and capacity estimates for these future installations are included below, but are subject to change.

---

<sup>5</sup> In FY18, the majority of community solar projects were being developed using a power purchase agreement (PPA) model, rather than an ownership model.

*Program Accomplishments*

<b>Fiscal Year</b>	<b>FY18</b>
Total # of awards	8
Estimated total new electricity generation of all community solar projects receiving LMI incentives(kWh/year) from MEA	20,537,798
Overall total capacity of community Solar PV (kW) projects receiving LMI incentives from MEA	14,154
Estimated amount of new electricity generation from the incentivized Community Solar projects directed specifically to the LMI community (kWh/year) <sup>6</sup>	7,547,969
Capacity of the incentivized Community solar projects that is directed specifically to the LMI community (kW)	5,141

---

<sup>6</sup> The generation capacity and corresponding electricity generation directed specifically to LMI participants is a subset of each participating Community Solar project.

## D. Maryland Smart Energy Communities

*SEIF Expenditures and Encumbrances: \$ 0.776 million*

### *Beneficiaries:*

Local incorporated governments (towns, cities, and counties) benefit from this program. Examples of Maryland Smart Energy Communities participants in FY18 included Baltimore City, District Heights, Berlin, Emmitsburg, Rock Hall, Taneytown, Salisbury, Annapolis, and Hagerstown; and counties including Frederick, Garrett, and Charles.

### *Description:*

The goal of the Maryland Smart Energy Communities (MSEC) program is to have local governments adopt energy policies and commit to them for the long term, leading to sustained energy savings and additional opportunities for renewable energy development. Once adopted into the program, the local government enacts energy goals and develops an energy baseline. Once the local government has successfully adopted at least two out of three energy policies (i.e., energy efficiency, renewable energy, and transportation), it can leverage program funding to assist with energy projects that help achieve its MSEC goals. Maryland Smart Energy Communities gain a better understanding of their energy usage, enabling them to reduce energy costs and help achieve the State's energy and environmental goals.

### *Program Accomplishments*

MSEC has a total of 68 Maryland communities that have participated in the program, across multiple fiscal years. 18 MSEC awards were made in FY18, with two awards going to new communities.

Energy savings estimates shown below are only based on the FY18 awards to existing MSEC communities for energy projects identified in their respective MSEC grant agreements. Savings from other energy projects that contribute to the MSEC energy goals, but do not receive direct MSEC funding, are not included in the estimates below. In addition, new MSEC communities accepted into the program in FY18 are still developing their specific energy projects so savings from these projects are not included in the estimates below.

<b>Fiscal Year</b>	<b>FY18</b>
# of MSEC awards to municipal governments in FY18	13
# of MSEC awards to county governments in FY18	5
# of new MSEC communities in FY18	2
# of new MSEC communities in FY18 that have successfully adopted the energy policies to date	0 of 2 (in progress)

Estimated annual savings (kWh) anticipated from FY18 projects for existing MSEC communities	880,900
Anticipated solar PV capacity (kW) from FY18 projects for existing MSEC communities	73.75
Anticipated gasoline gallon equivalents (GGE) anticipated from FY18 projects for existing MSEC communities	13,896

<b>Maryland Smart Energy Communities</b>		
Aberdeen	<b>Annapolis (new in FY18)</b>	Anne Arundel County
Baltimore City	Anne Arundel County	Bel Air
Berlin	Berwyn Heights	Bladensburg
Boonsboro	Bowie	Brentwood
Calvert County	Cambridge	Capitol Heights
Cecilton	<b>Charles County (new in FY18)</b>	College Park
Cottage City	Cumberland	Denton
District Heights	Easton	Edmonston
Emmitsburg	Fairmount Heights	Federalsburg
Forest Heights	Frederick	Frederick County
Frostburg	Gaithersburg	Garrett County
Glenarden	Greenbelt	Greensboro
Hagerstown	Harford County	Highland Beach
Hyattsville	Indian Head	Landover Hills
Manchester	Middletown	Millington
Montgomery County	Mount Rainier	New Carrollton
North Beach	Ocean City	Oxford
Prince George's County	Princess Anne	Ridgely
Riverdale Park	Rock Hall	Rockville
Salisbury	Seat Pleasant	Snow Hill
Somerset	Takoma Park	Talbot County
Taneytown	Thurmont	University Park
Westernport	Westminster	

## **E. Commercial and Industrial Grant Program**

*SEIF Expenditures and Encumbrances: \$0.735 million*

### *Beneficiaries*

The Commercial and Industrial (C&I) Grant Program offers financial incentives to Maryland's commercial and industrial building sector.

### *Description*

In its fifth year in FY18, the C&I Grant Program provided grants to commercial and industrial applicants to install energy efficiency measures that achieve deep reductions in total building or space electricity usage. Grants awards were based on the percentage of electricity reduction with higher incentives for deeper energy savings, covering from 30% to 50% of total project cost after utility incentives and other leveraged funds are applied.

### *Program Accomplishments*

Some projects funded through this program have long lead times and therefore many are still being installed. FY18 annual savings estimates below reflect the initial projections of the electricity reductions that are anticipated to accrue from program-funded projects, but are subject to change. The summary report below shows anticipated total project savings, including energy savings from any energy measures that may be benefitting from other funding sources, including utility incentives.

<b>Fiscal Year</b>	<b>FY18</b>
# of grants awarded	6
Annual savings (kWh)	3,609,352

**F. Kathleen A. P. Mathias Agricultural Energy Efficiency Program**

*SEIF Expenditures and Encumbrances: \$0.258 million*

*Beneficiaries*

The program benefits agricultural businesses and farms.

*Description*

The Kathleen A. P. Mathias Program has been designed to highlight cost-effective energy improvements in the agriculture sector. The FY18 program focused on energy efficiency upgrades. Examples of funded projects in FY18 include insulation, air sealing, lighting, boiler, and grain dryer efficiency improvements.

*Program Accomplishments*

Through the program, MEA shares information on the projects, giving farms and businesses in the agriculture sector a local example of energy improvements and helping them to make informed decisions about pursuing similar upgrades on their own. A goal of the program is to highlight best practices and cost-effective retrofit opportunities in Maryland’s agricultural community.

Some projects funded by FY18 grants are still being installed by grantees. The annual savings estimates shown below are based on initial audit estimates. FY18 energy savings will be finalized as part of the project close-out process once all measures are installed.

<b>Fiscal Year</b>	<b>FY18</b>
# of grants	9
Estimated annual electricity savings (kWh)	59,185
Estimated annual heating fuel savings (MMBTU)	3,346

## **G. Next Generation Energy Efficiency for the Industrial Sector**

***SEIF Expenditures and Encumbrances: \$1.00 million***

### *Beneficiaries*

Maryland manufacturers located within the Pepco and Delmarva Power service territories benefit from this program.

### *Description*

This program was initially offered in the BGE service territory through the Customer Investment Fund (CIF). Based upon the program's success, it relaunched to serve manufacturers in the Pepco and Delmarva Power service territories using funding from the Pepco Most Favored Nation (MFN) settlement. As in the previous iteration, the Next Generation Energy Efficiency Gains (NGEEG) program funds training and consulting efforts that help Maryland manufacturers in the Pepco and Delmarva service territories implement energy efficiency upgrades by compelling management and employees of the return on investment (ROI) benefits. Additionally, the program works with participants to help them access resources in the forms of grants, rebates, and other financial resources available in the State to implement energy efficiency measures. The Regional Manufacturing Institute (RMI) is the program implementer and MEA's role consists of disbursing the funds while providing financial, consultation, and outreach support and oversight.

### *Program Accomplishments*

The second iteration of this program launched in the second quarter of FY18. With this in mind, most of the effort in FY18 was focused on marketing, recruitment, and engagement with manufacturers in the two service territories. At the end of FY18, RMI had engaged and recruited seven firms in the Delmarva Power service territory and four in the Pepco service territory to participate in the program.

Multiple energy conservation measures (ECMs) have been suggested by the RMI team. It is expected the manufacturers participating in the program will starting completing ECMs in FY19.

## **H. Offshore Wind Programs**

SEIF Expenditures and Encumbrances: *\$1.639 million*

Non-SEIF Expenditures and Encumbrances: *\$1.000 million*<sup>7</sup>

### *Beneficiaries*

This program provides funds to emerging businesses, non-profit organizations, and State, local, and municipal governments and their agencies/institutions.

### *Description*

The Offshore Wind Program includes the Offshore Wind Development Fund (OSWDF) and the Offshore Wind Business Development Fund (OSWBDF). Respectively, these funds are used for the development of offshore wind projects and creation of an offshore wind business supply chain in Maryland.

The Offshore Wind Development Fund has been used for phase one development of an offshore wind project, which includes environmental surveys and wind resource characterization campaigns. These activities help defray the costs and speed the efforts of an offshore wind energy developer to successfully navigate the Bureau of Ocean Energy Management's (BOEM) Environmental Impact Statement (EIS) process, which requires submission of a Site Assessment Plan (SAP) and a Construction and Operations Plan (COP).

The Offshore Wind Business Development Fund is used to help prepare Maryland's workforce and emerging businesses, including minority owned emerging businesses, to enter the offshore wind industry.

### *Program Accomplishments*

In FY18, encumbrances from the OSWDF were used to provide ongoing funding to the Business Network for Offshore Wind (B-NOW) to continue efforts to organize Maryland businesses entering the offshore wind industry. In addition, funding was provided to the Maryland Department of Natural Resources to enable passive acoustic monitoring to determine the offshore presence of marine mammals; monitor whales, dolphins, and porpoises in real time; and measure ambient noise levels within the Maryland Wind Energy Area (WEA). Funds were also used to investigate what influence turbine construction noise may play on black sea bass, in terms of physiological condition and displacement.

---

<sup>7</sup> The Maryland Offshore Wind Energy Act of 2013 created and housed the Offshore Wind Business Development Fund within MEA, but separate from the SEIF. MEA has included expenditures from the Offshore Wind Business Development Fund in annual SEIF reports in the past and is doing so again for consistency.

Funds from the OSWBDF were used to provide five grants in FY18 for offshore wind business and workforce development. Projects funded in FY18 include redevelopment of several commercial waterfront properties in West Ocean City, MD to be used for offshore wind surveys, staging, and operations and maintenance (O&M) activities. Another grant supported expansion of business operations for a Baltimore-based construction and metal fabrication facility. Workforce development grants focused on technical training related to welding and computer numerical control (CNC machining), as well as the expansion and relocation of an existing welding training center in Salisbury, MD.

## **I. Community Wind**

*SEIF Expenditures and Encumbrances: \$50,189*

### *Beneficiaries*

This program benefits businesses, non-profits, and government entities across Maryland. Community wind projects are distributed wind turbines between 1 to 750 kW that benefit a local community.

### *Description*

Through the loan of anemometers, MEA helped defray risk and upfront costs associated with wind speed data collection campaigns required for community wind project development. MEA has several meteorological towers (anemometer towers) which have been deployed to collect wind speed and temperature data for interested entities across the State.

### *Program Accomplishments*

At the beginning of FY18, anemometer towers had previously been installed at three locations:

- Garrett County Government - 12091 Maryland Highway, Swanton MD 21561
- Garrett County Government – 13168 National Pike, Grantsville, MD 21536
- Maryland Department of Transportation – 853 Oceanic Drive, Annapolis, MD 21409

After collecting at least twelve months of wind speed and meteorological data, the deployed towers were removed so that data analysis could commence. In a synergy between energy programs, Garrett County's anemometer data is going to be analyzed in conjunction with the County's participation in the Maryland Smart Energy Communities program.

## J. Transportation

*SEIF Expenditures and Encumbrances: \$2.908 million*

Beneficiaries include homeowners, businesses, nonprofits, and State and local government entities that install alternative fuel refueling/charging infrastructure or purchase alternative fueled vehicles.

### *Description*

MEA runs incentive programs that aim to reduce traditional petroleum use in Maryland's transportation sector while saving vehicle owners money through reduced fuel, operations and maintenance costs. The programs accomplished this goal by increasing the number of alternative fueled vehicles and the amount of alternative fuel refueling/charging infrastructure in the State. These programs include:

- Electric Vehicle Supply Equipment (EVSE) Rebate Program
- Alternative Fuel Infrastructure Program (AFIP)
- Freedom Fleet Voucher Program (FFVP)

Some projects awarded grant funds in FY18 are still in progress. For this reason, the summary below shows estimated project metrics and benefits associated with FY18 grants, which are subject to change.

### *Program Accomplishments*

<b>Fiscal Year</b>	<b>FY18</b>
# of EVSE (electric vehicle chargers) rebated	626
# of AFIP direct current (DC) Fast charging stations/locations	16 stations at 7 locations
# of AFIP ethanol refueling pumps/locations	40 pumps at 5 locations
# of alternative fuel vehicles awarded	154
Total estimated annual petroleum displacement	2,823,457 gallons <sup>8</sup>

---

<sup>8</sup> This figure includes petroleum displacement from the FFVP and AFIP programs only.

## K. Combined Heat and Power Grant Program

*SEIF Expenditures and Encumbrances: \$4.923 million*

### *Beneficiaries*

The Combined Heat and Power (CHP) Grant Program encourages the implementation of CHP technologies in Maryland’s critical infrastructure, such as healthcare and wastewater treatment, as well as commercial and industrial facilities, including multifamily buildings.

### *Description*

In fiscal year 2015, the Maryland Energy Administration (MEA) launched this program to encourage Combined Heat and Power development, initially targeting healthcare and publicly owned wastewater treatment facilities throughout Maryland. These two industries were selected because of the inherent requirement for enhanced electricity resiliency. In fiscal year 2016, the CHP program was expanded to include manufacturers as well as critical infrastructure facilities. In addition, the program also targeted projects that leveraged biogas or biomass as a fuel source in industrial manufacturers or critical infrastructure facilities. In fiscal year 2017, the CHP program expanded again to also include commercial and industrial facilities.

The commissioning of CHP systems will improve efficiencies, reduce greenhouse gas emissions, and can result in lower operational costs.

Sixteen CHP projects were awarded FY18 funding, the largest number of any fiscal year in which the program has been offered. Projects awarded grant funds in FY18 are still in progress. For this reason, the summary below shows estimated project metrics and benefits associated with FY18 grants, which are subject to change.

### *Program Accomplishments*

<b>Fiscal Year</b>	<b>FY18</b>
# of CHP systems incentivized	16
Anticipated CHP capacity (MW)	23.57
Estimated annual energy savings (MMBTU/year)	541,341

To date, five CHP projects from prior fiscal years have been completed, four of which were completed at hospital locations across Maryland. After factoring in the now displaced off-site electricity production and prior thermal energy usage in comparison to the installed CHP system that now helps meet facility electricity and thermal demands, participating hospitals saw reductions in overall energy usage (on a MMBTU/year basis) of at least 20%.

## L. Animal Waste-to-Energy Program

*SEIF Expenditures and Encumbrances: \$2.875 million*

### *Beneficiaries*

The Animal Waste-to-Energy Grant Program offers financial incentives to eligible Maryland businesses and nonprofit organizations, as well as state and local government organizations.

### *Description*

The Animal Waste-to-Energy Grant Program resulted from the recognition that there is proven potential in converting animal waste to energy. Beyond the energy benefits, the program also assists with the removal of key nutrients from the Chesapeake Bay Watershed. The projects can also produce byproducts that can be used beneficially and as a commodity.

### *Program Accomplishments*

The types of projects funded through this program have long lead times and therefore FY18 projects are still being installed. The annual estimates listed below reflect projections of the electricity production that is anticipated once projects are fully installed, but are subject to change.

<b>Fiscal Year</b>	<b>FY18</b>
# of Projects receiving an award	3
Anticipated Capacity Estimate (MW)	1.5

## M. Net Zero Schools

*SEIF Expenditures and Encumbrances: \$2.240M*

### *Beneficiaries*

The program benefits local education agencies (LEAs) constructing new public schools in the Baltimore Gas and Electric service territory. Under this program, Howard County Public Schools has successfully constructed and is operating one participating net zero school while Baltimore City Public School System has two schools designed to achieve net zero energy.

### *Description*

Through this Customer Investment Fund (CIF) program, three new public schools located within the BGE service territory will be designed and constructed with the goal of achieving net zero energy usage. This program will help fund the incremental cost of design and construction for the participating schools, as well as post-evaluation and showcasing.

### *Program Accomplishments*

The new Wilde Lake Middle School opened in Howard County in January 2017. **The new school has increased capacity to be able to serve 49% more students while designed to use 50% less energy compared to the previous Wilde Lake Middle School.** Now that one full year of school operation has been completed, the energy performance of the new Wilde Lake Middle School was evaluated to confirm net zero energy status. **MEA is pleased to report that the new Wilde Lake Middle School has been verified to have successfully achieved net zero energy performance, with electricity generation from the school's solar photovoltaic systems exceeding the total annual energy usage of the school.**

Construction activity is underway for the two participating Baltimore City schools, Graceland Park O'Donnell Heights Elementary/Middle School and Holabird Elementary/Middle School, with building construction completion and occupancy expected in August 2020.

As new school design and construction is a multiyear process, energy savings and generation benefits do not begin to accrue until each net zero school is fully constructed and operational. For this reason, only first year performance for Wilde Lake Middle school is reported below, along with the anticipated solar energy capacity anticipated to be installed on the Baltimore City schools currently under construction.

Fiscal Year	FY18
# of net zero school projects <sup>9</sup>	3
# of net zero schools in operation	1 (Wilde Lake Middle School)

<sup>9</sup> Since the commencement of the program.

kW of solar energy installed at Wilde Lake Middle	633 kW
Wilde Lake Middle School year one total energy usage (equivalent MWh) <sup>10</sup>	470
Wilde Lake Middle School year one energy production (MWh) <sup>11</sup>	782
Anticipated solar energy capacity once the Baltimore City projects are fully installed (kW) <sup>12</sup>	600 kW (Graceland Park O'Donnell Heights Elementary and Holabird Elementary/Middle)

---

<sup>10</sup> Reflects year one actual energy usage absent any weather normalization. With weather normalization, results also achieve net zero energy status.

<sup>11</sup> Reflects year one actual energy production absent any weather normalization.

<sup>12</sup> Anticipated renewable energy capacity for the two Baltimore City net zero schools.

## **N. Data Center Energy Efficiency Grant Program**

*SEIF Expenditures and Encumbrances: \$0.480 million*

### *Beneficiaries*

The Data Center Energy Efficiency Grant Pilot Program offers financial incentives to Maryland's information technology sector. The program is open to any commercial, state/local government, or non-profit data center located, or being constructed, within the State of Maryland with an overall data floor facility size of at least 2,000 square feet.

### *Description*

Offered for the second time in FY18, the Data Center Energy Efficiency Grant program sought innovative energy efficiency solutions to reduce electrical usage in new and existing data centers. In existing data centers, the program also aims to improve overall Power Usage Effectiveness (PUE). The program provides competitive grants to eligible data centers for energy efficiency measures that include, but are not limited to, server virtualization, air flow optimization, aisle containment, lighting controls, variable frequency drives, heating, ventilation, and air conditioning (HVAC) upgrades, and building insulation and envelope improvements.

### *Program Accomplishments*

Some projects funded through this program have long lead times and, therefore, many are still being installed. FY18 annual savings estimates below reflect the projections of the electricity reductions that are anticipated to accrue from program-funded projects, but are subject to change. The summary report below shows anticipated total project savings, including energy savings from any energy measures that may be benefitting from other funding sources, including utility incentives.

<b>Fiscal Year</b>	<b>FY18</b>
# of grants awarded	4
Anticipated Annual savings (kWh)	3,037,300

**\*\*In addition, MEA's Data Center Energy Efficiency Grant Program was recognized as one of four international nominees for a 2018 Global Data Center award. Presented in London, MEA was nominated in the Innovative Industry of the Year award category.\*\***

## **O. Maryland Community College Energy Efficiency Grant Pilot Program**

**\*\*THIS IS A NEW PROGRAM OFFERED FOR THE FIRST TIME IN FY18.\*\***

*SEIF Expenditures and Encumbrances: \$0.020 million*

### *Beneficiaries*

The Maryland Community College Energy Efficiency Grant Pilot Program offers financial and technical assistance to Maryland's community colleges to encourage the implementation of cost-effective energy efficiency projects on campus. In FY18, MEA launched a pilot version to serve a limited number of colleges, testing the feasibility of a potentially larger program in the future. Cecil College opted to participate in the FY18 pilot.

### *Description*

The Maryland Community College Energy Efficiency Pilot Program worked with the State's community college network to encourage the implementation of cost-saving energy efficiency measures on community college campuses. The Community College Energy Efficiency Pilot Program concept recognized community colleges may have limited resources to fully pursue facility energy efficiency improvements. The participating community college will obtain MEA technical support as a potential energy efficiency project is developed, commencing with an energy audit and proceeding to project implementation, should cost effective measures be identified.

### *Program Accomplishments*

<b>Fiscal Year</b>	<b>FY18</b>
# of grants awarded	1
Anticipated Annual savings (kWh) <sup>13</sup>	TBD
Anticipated Annual savings (MMBTU)	TBD

---

<sup>13</sup> As a brand new program, no energy savings estimates are available at this time. Potential savings will be quantified as part of an energy audit.

## **P. Energy Technical Support**

*SEIF Expenditures and Encumbrances: \$0.515 million*

### *Beneficiaries*

Beneficiaries include all Marylanders

### *Description*

MEA funded technical and outreach support for efforts that support the State's energy efficiency, renewable energy, and energy-related transportation initiatives, as well as improve energy reliability and resiliency.

Energy programs that received support from FY18 funding include:

- the Clean Energy Communities Low-to-Moderate Income Program;
- the Maryland Smart Energy Communities Program;
- the Commercial and Industrial Program;
- the Data Center Energy Efficiency Program;
- the Net Zero Energy School Program;
- the Kathleen A.P. Mathias Agriculture Program;
- the Community Solar Program, and,
- the Community Wind Program.

## **Q. Communications and Marketing**

*SEIF Expenditures and Encumbrances: \$0.033 million*

### *Beneficiaries*

All Marylanders

### *Description*

In FY18, the funds under the Communications and Marketing budget were used to promote MEA energy programs, as well as increase general energy awareness. MEA has increased the amount of outreach events to help support the incentives available to Maryland businesses, nonprofits, state and local governments, and residents. Communications and marketing activities in FY18 included:

- Working with the Clean Energy States Alliance (CESA), the Marylander's Guide for Solar was created. CESA had previously developed a general Guide for Solar which was customized by CESA and MEA staff in FY18 to reflect Maryland's energy landscape, particularly related to solar. The publication can be found at <https://energy.maryland.gov/residential/Documents/A%20Maryland%20Consumers%20Guide%20to%20Solar%20LR72dpi.pdf>.
- Continued sponsorship with sister state agency Maryland Public Television (MPT) to enable TV spots promoting energy efficiency and MEA grants during two prime time shows, Maryland Farm and Harvest and NOVA. The viewership of MPT primetime is 2 million nightly views.
- Advertising MEA's energy programs in the JMore media publication.
- Updating agency promotional items for outreach at events to promote State energy programs. In FY18, MEA sent teams to exhibit at the Maryland Municipal League (MML) conference; Maryland Association of Counties (MACO) conference; the spring Maryland Home and Garden Show; Regional Manufacturing Institute Conference; Howard County Greenfest; Port Towns Day in Bladensburg, MD; and the International Offshore Wind Partnering Forum.
- Exhibited at the Custom Technology expo to demonstrate how energy-efficient technologies help businesses of all types and sizes save energy and money. Grants from State of Maryland agencies were promoted to in-state business owners.
- Exhibited and spoke at the World Trade Center "State of the Ports" event focusing on port infrastructure for offshore wind, future business opportunities, and growth in Maryland's offshore wind industry.

## **R. Administration**

*SEIF Expenditures and Encumbrances: \$3.622 million*

### *Beneficiaries*

All Marylanders benefit from the efforts that occur under the SEIF.

### *Description*

In addition to being a member of the Regional Greenhouse Gas Initiative, Maryland has enacted:

- a 25 percent renewable portfolio standard by 2020;
- a 2 percent annual energy efficiency goal for the State's EmPower utilities; and,
- a 40 percent reduction in greenhouse gas emissions by 2030, as enacted in 2016.

In order to help meet these goals, MEA managed and continued to enable numerous programs and initiatives that helped increase the use of renewable energy and energy efficiency technologies among every sector in the State. The Administration funding enabled MEA to administer the State's energy programs described throughout this report as well as to support energy policy and planning activity; travel in support of the execution of the SEIF and the State's energy goals, such as attendance and participation at Maryland Association of Counties (MACo) and Maryland Municipal League (MML) events; and the evaluation, measurement, and verification of MEA energy programs. MEA continued to design and launch new energy programs, while refining existing energy programs, helping to maintain the State's place as a national leader in energy.

### *Program Accomplishments*

In addition to MEA's SEIF accomplishments which have been well chronicled in the programs described in the previous sections, there have been many other areas of MEA activity that receive administrative resources in the form of staff time and travel.

In its role as the State's energy policy office, MEA participated in legislative-style proceedings and cases before the Public Service Commission (PSC). Many of the issues addressed in these matters will impact the State's energy landscape either from a renewable energy or energy efficiency standpoint.

Additionally, the PSC has initiated Public Conference 44 (PC44), known as the Grid of the Future docket. MEA was an active leader in PC44 which included five distinct working groups covering the following respective topics: rate design, interconnection, energy storage, electric vehicles, and customer choice/competitive markets.

Other PSC dockets in which MEA participated include the Community Solar working group and semi-annual EmPower proceedings.

Further, during FY18 MEA staff participated in various collaborative efforts such as the Electric Vehicle Infrastructure Council, the Maryland Green Buildings Council, the Power Plant Research Program Advisory Council, the Maryland Clean Energy Center Executive Board, the Maryland Commission on Climate Change, the Chesapeake Bay Subcabinet, the Smart Growth Subcabinet, and the Maryland Energy Innovation Fund Advisory Board.

Nationally, MEA staff has participated in events organized by the National Association of State Energy Officers, National Governors Association, PJM, Inc., American Wind Energy Association, Offshore Wind Business Network International Policy Forum, and the Southern States Energy Board.

## NON-MEA PROGRAMS

### S. Department of Human Services- Energy Universal Service Program Bill Assistance

SEIF FY18 Expenditures: \$27.000 million

#### Beneficiaries

The Office of Home Energy Programs (OHEP) within the Maryland Department of Human Services (DHS) used SEIF to provide electric utility payment assistance to eligible low-income households. Program eligibility requires the applicant household to be a resident of Maryland, have income equal or less than 175% of the Federal Poverty Level, and agree to use utility budget billing. The applicant must also have an electric bill in their name.

#### Description

SEIF funds were used for Electric Universal Service Program (EUSP) Bill Assistance and Arrearage Retirement Assistance Program benefits. Bill payment assistance benefits help make ongoing electric bills more affordable by paying a portion of a household’s monthly bill. Benefit amounts are based on electric usage, household size, and income. Funds generated through the EUSP utility ratepayer service charge provide most of the funding for Bill Assistance, with SEIF used when ratepayer funds are exhausted.

Arrearage Retirement Assistance retires past due bills, up to a maximum amount of \$2,000. An arrearage benefit is generally available once per applicant every seven years. Benefits are paid directly to electric utilities on behalf of the program applicant.

#### Program Accomplishments

By preventing and resolving utility disconnections that may result in life-threatening health and safety concerns or result in households becoming homeless, bill assistance grants kept bills at an affordable level to prevent customers from experiencing a utility crisis.

FY18	Households Served	Total Benefits Paid	SEIF Benefits Paid
Bill Assistance	94,655	\$ 47,157,028.00	\$ 12,314,240.94
Arrearage Retirement Assistance <sup>14</sup>	16,862	\$ 14,685,759.06	\$ 14,685,759.06
<b>Total Benefit</b>	94,655	\$ 62,334,780.13	\$ 27,000,000.00

<sup>14</sup> Arrearage recipients are a sub-set of EUSP Bill Assistance recipients.

## **T. Department of Housing and Community Development (DHCD) – Energy Efficient Homes Construction Loan Fund Program**

*SEIF FY18 Transfers:       \$1.100 million*

### *Beneficiaries*

Funds were transferred from the SEIF to the Department of Housing and Community Development (DHCD) Energy Efficient Homes Construction Loan Fund. In this way, the direct beneficiary was DHCD's Energy Efficient Homes Construction Loan Program.

DHCD reports that the Home Energy Efficient Construction Loan Program, frequently referred to as the Net Zero Homes Program, provided a construction loan to one multifamily project in FY18.

### *Description*

The FY18 construction loan has been committed by DHCD to the Port and West Street project in Easton, MD. The project consists of nine apartments split between two buildings that will be rented to low income households. The units are being designed to be net zero energy.

This is a new construction project. Building shell, thermal barrier, appliances, lighting, heating and cooling equipment will all be installed with higher efficiencies than required by building code. A small solar photovoltaic array will then be used to offset the energy demand.

Measures funded through SEIF include:

- Solar photovoltaic array (451 kW)
- LED lighting
- High efficiency water heaters
- ENERGY STAR appliances
- Above code thermal barrier

### *Program Accomplishments*

DHCD reports that exact energy modeling and analysis has not yet been completed on the design of this project. However, the project will ultimately be designed to achieve net zero energy.

## U. Department of Housing and Community Development – U.S. Department of Energy Weatherization Assistance Program

*SEIF FY18 Total Expenditures and Encumbrances:* \$815,606

### *Beneficiaries*

SEIF funds allocated to the Department of Energy Weatherization Assistance Program (DOE WAP) benefited low income Marylanders by enabling additional energy efficiency and health and safety measures to be completed over and above what DOE WAP's limits allow.

### *Description*

As of June 30, 2018, DHCD reports that SEIF funds have enabled five single family homes to receive benefits through the program. The SEIF funding was used for energy savings measures including insulation and heating, ventilation, and air conditioning (HVAC) replacement, as well as health and safety issues, such as moisture problems that could prevent a home from being able to be assisted by the DOE WAP program. SEIF funds enabled the DOE WAP to stretch its federal funding further, resulting in more homes being assisted, including some homes that may not have otherwise been able to participate due to the cost cap of the DOE WAP program.

### *Program Accomplishments*

Through the use of SEIF funds, the following accomplishments occurred (as of June 30, 2018<sup>15</sup>):

<b>Fiscal Year</b>	<b>FY18</b>
# of single family households assisted	5
Projected annual electricity savings for completed projects (kWh/year)	40,244

---

<sup>15</sup> The majority of DHCD's funds were encumbered, but not yet expended, as of June 30<sup>th</sup>, 2018. Program accomplishments listed above only reflect homes upgraded by June 30, 2018.

## **V. Maryland Department of the Environment (MDE) – Climate Change Program**

Transfers to Maryland Clean Air Fund: \$2.739 million

Transfers to Support RGGI Inc. membership: \$0.499 million

### *Program Beneficiaries and Participants*

The State of Maryland

### *Description*

As required by §9-20B-04 of the State Government Article, moneys are provided from SEIF to the Clean Air Fund managed by the Department of the Environment. SEIF is used to fund the costs of the Department's programs to reduce or mitigate the effects of climate change. SEIF is also used by MDE to pay bi-annual dues for Maryland's membership in RGGI, Inc.

### *Program Accomplishments*

- Funds transferred into the Maryland Clean Air Fund support MDE's programs to reduce or mitigate the effects of climate change.
- Due to delays in fiscal year accounting close out, funds were not transferred to MDE to support RGGI Inc. dues. Funds will be transferred during FY19 to support the FY18 payment of RGGI dues. These funds support Maryland's involvement with the Regional Greenhouse Gas Initiative (RGGI), the regional organization that assists the nine member states with the operational aspects of the RGGI program. Member states are required to pay dues to RGGI, Inc. for their share of the operational costs of the auction platform for the cap and invest program that generates the SEIF funds, as well as for other implementation costs.

**W. Maryland Department of the Environment – Energy-Water Infrastructure Program  
(EWIP)**

SEIF FY18 Expenditures and Encumbrances: \$0

SEIF Expenditure in FY18 that utilized prior year funding: \$3.927 million

SEIF Encumbrance in FY18 that utilized prior year funding: \$3.964 million

*Beneficiaries*

Maryland water and waste water treatment plant owners

*Description*

The Energy-Water Infrastructure Program provides capital grant funds to water and wastewater treatment plant owners to develop energy efficient and resilient projects, including combined heat and power systems and other alternative or green energy sources, and for replacement of aging equipment with newer, more energy efficient technologies. The program focuses on promoting onsite waste to energy power generation by commissioning new combined heat and power systems or other alternative/green energy sources as well as upgrading or replacing aging pumps and process equipment with more efficient units.

*Program Accomplishments*

In FY18, prior fiscal year funding<sup>16</sup> was encumbered by MDE to the following eight projects:

- a lighting efficiency upgrade project at the Kent County Water Treatment Plant and Wastewater Treatment plants;
- a replacement pump project at the Salisbury Water Treatment Plant;
- an energy reduction project for the Town of Delmar's Pine Street pump station;
- an energy efficiency project for the Princess Anne wastewater treatment plant;
- a pump replacement project for the Little Patuxent Water Reclamation Plant influent pump station;
- a system-wide water pressure reduction project for the Town of Pittsville;
- an energy improvement project for the Pocomoke City Clarke Avenue pump station; and,
- a solar project at the Sharptown Water Treatment plant.

---

<sup>16</sup> All of these projects appear to have been allocated or awarded funds from prior fiscal year appropriation, rather than FY18 appropriation as is typically listed in this report.

## X. Electric Vehicle Excise Tax Credit

*SEIF Reimbursement: \$2.4 million*

### *Beneficiaries*

Anyone who registers an eligible, new electric vehicle (EV) in the State of Maryland, up to available funding levels.

### *Description*

In 2010, the Maryland General Assembly passed a credit against the motor vehicle excise tax for certain qualified plug-in electric drive vehicles. This was a three-year program and each vehicle was eligible for up to \$2,000. In 2013, the legislature extended the statute by one year and changed the incentives to be tiered based on vehicle kWh battery capacity. In 2014, the legislature extended the statute by 3 years and changed the tiered system to a flat \$125/kWh of battery capacity up to \$3,000. More recently, the Clean Cars Act of 2017 established some new eligibility requirements and set the maximum tax incentives at \$100/kWh of battery capacity, up to \$3000.

As in previous years, SEIF funds were used to reimburse the State of Maryland Transportation Trust Fund for electric vehicle excise tax credits claimed during tax year 2017.

### *Program Accomplishments*

To provide the most recent program results, the activity described below reflects activity from FY18, rather than historical activity from calendar year 2017 reimbursed in FY18.

<b>Fiscal Year</b>	<b>FY18</b>
# of tax credits issued <sup>17</sup>	1,551
Total sum of tax credits issued in FY18	\$2,978,547.83
\$ reimbursed to State Treasury in FY18 for tax year 2017	\$2.4 million
Annual savings (Gasoline Gallon Equivalents (GGE)) <sup>18</sup>	576,029

<sup>17</sup> Tax credit information provided to MEA by the Motor Vehicle Administration, the administrator of the program. Some credits are paid by the Maryland Department of Transportation. The Motor Vehicle Administration is a modal agency of the Maryland Department of Transportation.

<sup>18</sup> In some previous SEIF reports, GGE was reported over the entire estimated eight-year life of the battery. GGE is now being reported on an annual basis.

## Y. Department of General Services

*SEIF FY18 Expenditures and Encumbrances: \$0.999 million*

### *Beneficiaries*

State agencies and Maryland taxpayers benefited from this program. The DGS Office of Energy Performance and Conservation, which was partially supported by SEIF in FY18, provides professional and technical services to reduce state agency energy consumption through identification of energy reduction opportunities and energy performance contracting (EPC). The DGS Office of Energy Performance and Conservation also worked on agency energy planning and energy use tracking.

### *Program Accomplishments*

Through this program, DGS accomplished the following:

- Supported the State's EPC program, with DGS staff working on three State facility EPC projects in FY18 that total \$16.3M. These three EPC projects were underway at the following locations:
  - Maryland Department of Health (MDH) - Finan Center;
  - MDH- Holly Center and Perkins Center; and,
  - Motor Vehicle Administration (MVA) - multiple locations.

In FY18, DGS indicates that these projects have combined annual guaranteed financial savings of \$1.7 million while resulting in 6,744 tons of carbon dioxide abated.

- Continued to work on the State's energy use tracking database. In FY18, DGS requested that 38 state agencies update building stock information in the database, including information on building size, facility age, and primary usage. DGS also worked with the contractor that manages the database to add further functionality to enable the database to be better leveraged to track and analyze energy consumption on a per building basis.

## **Z. Department of License and Labor Regulation- EARN Maryland Green Jobs**

*SEIF FY18 Expenditures and Encumbrances: \$1.0 million*

### *Beneficiaries*

Maryland businesses with specific workforce training needs; as well as Maryland workers, particularly those that may be facing barriers to employment.

### *Program Accomplishments*

The EARN Maryland Green Jobs Initiative funded four Strategic Industry Partnerships:

- Clean Energy Training Partnership Howard County and Clean Energy Training Partnership Baltimore- Led by the Living Classrooms Foundation in partnership with Power52, the Clean Energy Training Partnership is implementing a needs-based employment training program to prepare unemployed and underemployed individuals for sustainable employment in the renewable energy industry. The program combines classroom training and eight weeks of hands-on experience, where participants have the opportunity to apply learned skills. Following training, participants will sit for the North American Board of Certified Energy Practitioners (NABCEP) Certification.
- Sustainable Energy Workforce Development Program- To enable recruitment and development of a qualified pipeline of workers, the Sustainable Energy Workforce Development Program in Prince George's County unites business partners with training institutions, community-based organizations, and workforce partners to provide work-based learning, occupational skills training, and career readiness training for the sustainable energy sector. The Program provides basic literacy, numeracy work readiness, and general utility construction trades skills. Participants have the opportunity to earn industry-recognized certifications, including OSHA 10, CPR/First Aid, and Electrical Level 1.
- Solar Installation Training Partnership- Civic Works partners with twelve employer partners to lead an industry-led program that prepares unemployed, underemployed and incumbent workers for careers in the solar industry. Participant training includes essential and occupational skills preparation, the industry-recognized OSHA 30-hour Construction Safety certification, 96 hours of NABCEP hands-on practicum, and 320 hours of on-the-job training. Incumbent workers receive training in leadership, project management, energy analysis, and sales skills necessary to advance to higher-skill positions within the workforce and will deliver the NABCEP Associate credential.

As of June 30, 2018, 50 unemployed and underemployed individuals had completed training. Of those, 48 obtained employment. 10 incumbent workers received training.

DLLR anticipates that ultimately over 200 individuals will be trained with FY18 SEIF funds.

## **AA. Maryland Department of Agriculture**

*SEIF FY18 Expenditures and Encumbrances: \$1.95 million*

### *Beneficiaries*

The Animal Waste Technology fund managed by the Maryland Department of Agriculture was the direct beneficiary. The Maryland Department of Agriculture selects individual animal waste-to-energy projects to receive awards from the Animal Waste Technology Fund. Projects receiving funding from the Animal Waste Technology Fund help support the creation of Tier 1 renewable energy resources, as well as help reduce the movement of nitrogen and/or phosphorus to Maryland waterways.

### *Program Accomplishments*

In FY18, MDA indicates that one anaerobic digester project was funded. This project, at a large dairy farm, will retrofit an existing but currently non-operational digester system to create reliable power throughout the year. The project will use manure from the onsite cow population coupled with off-site organic wastes as the source material for the anaerobic digester. The project is anticipated to produce methane-rich biogas that will then be fed to a reciprocating engine generator. The University of Maryland will provide third-party monitoring of this project.

## **BB. Maryland Energy Innovation Institute**

SEIF FY18 Transfers: \$1,5000,000

### *Summary*

As required by Section 3 of Chapter 365 of the Acts of the General Assembly of 2017, \$1.5 million in SEIF funds were transferred from SEIF to the Maryland Energy Innovation Fund in FY18. The Maryland Energy Innovation Institute (MEII) that manages the Maryland Energy Innovation Fund has produced an annual report of FY18 MEII activity, available on the MEII website at <https://energy.umd.edu/sites/energy.umd.edu/files/2018AnnualReportFINAL.pdf>.<sup>19</sup>

---

<sup>19</sup> The Maryland Clean Energy Center, which in previous years received funding from the SEIF, now receives funding from the Maryland Energy Innovation Fund through MEII.

## **CC. Department of Health Energy Performance Contract (EPC) Repayments**

*SEIF Expenditure and Encumbrances:* \$2.251 million

### *Beneficiaries*

State agencies benefit from this program.

### *Description*

In Maryland, general funds normally pay for state agencies' energy bills. To lower those bills, many state agencies are currently participating in energy performance contracts (EPCs). EPCs are intended to be self-funded with the State taking out loans to pay for energy improvements through the EPC, and the annual energy savings from those EPC improvements guaranteed to be more than enough to repay those loans. However, for several past Maryland Department of Health (MDH) EPCs, instead of using the energy savings to repay the loans, the State has chosen to use RGGI-derived SEIF funds allocated for energy efficiency to repay the loans, thereby freeing up general funds to address other needs in the State budget.

### *Program Accomplishments*

RGGI-funded SEIF investments in this program freed up \$2.251 million of General Funds that otherwise would have to pay State Agencies' energy bills.

## Strategic Energy Investment Fund Planning<sup>20</sup>

### *Introduction*

In the earlier years of SEIF, SEIF was primarily funded through RGGI proceeds; however, SEIF has since expanded to include funding from multiple non-RGGI sources further described in Appendix A. As outlined elsewhere in this report, RGGI-originated SEIF proceeds are lower than in some earlier years and fluctuate, impacted by many outside factors. With this in mind, in recent years SEIF funds from non-RGGI sources have been making up a greater percentage of the overall SEIF budget. Historically, the majority of non-RGGI contributions to SEIF have come from settlement agreements in matters before the Maryland Public Service Commission and in most cases are not known in advance and thus not predictable. Funds from these settlement agreements come with prescribed allowable uses which in some cases are similar to the prescriptive uses of funds derived from the RGGI auctions. In many cases, these funds are restricted to distinct uses and geographic areas of the State. Thus, long-term SEIF forecasting over multiple years can be challenging. With these considerations in mind, MEA provides the following discussion of funding source availability and future SEIF programming forecast, as well as an update on the status of the SEIF Advisory Board.

### *Fund Source Availability*

#### Regional Greenhouse Gas Initiative<sup>21</sup>

Revenues from RGGI auctions have historically been volatile; sensitive to both market fundamentals and changes in local and national policy. Since the first auction, auction clearing prices have varied from \$1.86 to \$7.50 per RGGI allowance. All the while, the number of allowances available has decreased as the RGGI cap decreased from 188 million allowances per year in calendar year 2009 to 56 million allowances in calendar year 2020.

---

<sup>20</sup> This section is being added to the MEA Annual SEIF Report in anticipation of legislation that would expand the statutory reporting requirement. The proposed legislation seeks to incorporate a prospective reporting requirement into this annual report to provide greater transparency regarding the administration of the SEIF and to more regularly inform policymakers of the prospective course of the Strategic Energy Investment Program.

<sup>21</sup> The Regional Greenhouse Gas Initiative (RGGI) is the first mandatory market-based program in the United States to reduce greenhouse gas emissions. RGGI is a cooperative effort among the states of Connecticut, Delaware, Maine, Maryland, Massachusetts, New Hampshire, New York, Rhode Island, and Vermont to cap and reduce CO<sub>2</sub> emissions from the power sector.

The RGGI CO<sub>2</sub> cap represents a regional budget for CO<sub>2</sub> emissions from the power sector. States sell nearly all of these emission allowances through auctions, and invest proceeds in energy efficiency, renewable energy, and other consumer benefit programs that spur innovation in the clean energy economy and create green jobs in the RGGI states.

Following announcement of program changes from the 2012 RGGI Program Review, auction clearing prices generally trended upward through Auction #30 in December 2015 (\$7.50 per allowance). However, Maryland's RGGI revenues peaked at \$32 million in September 2015 due to the release of the Cost Containment Reserve (CCR) during Auction #29 when prices hit \$6.02 per allowance.<sup>22</sup> Auction clearing prices and revenues began to decline rapidly after Auction #30 and reached their lowest level since 2012 in the June 2017 auction (#36) with a \$2.51 clearance price and \$7.5 million in revenues. Auction clearance prices and revenue have subsequently rebounded somewhat following the announcement of planned program changes from the 2016/17 RGGI Program Review.

As a result of the dramatic drop of clearance prices and revenues following Auction #30, MEA adopted a conservative approach to the projection of RGGI revenues in the state's budget. Commencing with the FY2019 budget, auction revenues were projected at the auction floor price (currently set at \$2.20), assuming all available allowances sell. This conservative approach builds a definitive revenue base in the face of the RGGI volatility and allows for the budgeting of revenue over the auction floor price in the subsequent budget cycle.<sup>23</sup>

In calendar year 2021, the changes of the 2016/2017 RGGI Program Review will start. Among the changes is the addition of the Emissions Containment Reserve (ECR) which will function as a counterpart to the Cost Containment Reserve (CCR) in effect since 2014. Both the CCR and the ECR will serve to adjust the supply of allowances in real time, in response to changes in auction allowance demand as reflected in the clearing price. The CCR provides an additional 10% of allowances if the clearance price exceeds a predetermined trigger (\$13.00 in 2021). The ECR instead withholds and retires 10% of the offered allowances if the clearance price falls below its predetermined trigger (\$6.00 in 2021). RGGI auction clearing prices have been rising since the announcement of these and other 2016/17 Program Review changes and, with the most recent auction clearance price of \$5.35 in the December 2018 auction (#42), appear to be approaching the level of ECR trigger price.

It cannot be determined whether the announcement of the 2016/17 Program Review changes directly impacted the RGGI market; however, it seems reasonable to assume that the changes will influence the market. It thus appears that commencing calendar 2021, the current floor-based RGGI revenue projection methodology may be overcome by the new RGGI auction mechanisms since the ECR will have been activated at the floor price, withholding and retiring allowances from the market. MEA is therefore exploring other conservative revenue projection strategies that will allow for credible SEIF-funded programming while minimizing the risk of shortfalls during execution.

#### Other SEIF sources

Fund balances from several non-RGGI, settlement-initiated funding sources originating in prior years, such as the Offshore Wind Development Fund and Alternative Compliance

---

<sup>22</sup> Even though the Auction #30 clearing price exceeded the CCR trigger of \$6.00, no CCR allowances were available after their release in Auction #29.

<sup>23</sup> For example, the \$14.5 million of revenue received during FY2018 over the amount initially projected using the floor clearance price was available for programming in the FY2020 budget.

Payments (ACP), remain in the SEIF. MEA intends for these funds to continue to be programmed moving forward, consistent with the respective funding source's allowable use(s) and subject to all necessary concurrences and approvals by the Governor and General Assembly.

### Gas Expansion

The SEIF is in receipt of funds to be utilized for the purpose of natural gas expansion within the State.<sup>24</sup> In April of 2018, the Maryland Public Service Commission (PSC) approved the merger of AltaGas Ltd. and WGL Holdings, Inc. One PSC condition of the merger was the creation of a Maryland Gas Expansion Fund (MGEF) to promote economic development, job creation and the expansion of natural gas infrastructure. MEA will develop and introduce programs that comply with the PSC merger order.

In addition to the MGEF, the State of Maryland was the beneficiary of a Most Favored Nation (MFN) provision in the PSC merger order, resulting in an additional \$3.878 million. The legislative-style hearing and comment period have taken place; however, the PSC has not issued an order regarding MFN dollars at the time of this writing.<sup>25</sup> Upon the issuance of a final order, MEA will develop and introduce programs that comply with the language and requirements of the order.

### *Programs*

Current MEA programs are anticipated to continue servicing all sectors of Maryland's economy. Due to the volatile nature of the revenue stream supplied by RGGI detailed elsewhere in this document, the Maryland Energy Administration will continue to constantly evaluate programs for efficacy and affordability.

### *RGGI Formula*

As required by § 9-20B-12 of the State Government article, MEA is required to report on recommendations for changes to the allocation of RGGI-derived SEIF funds. As the goal of the RGGI initiative is to reduce greenhouse gas emissions, MEA supports the use of RGGI funds for energy projects that enable greenhouse gas emission reductions, while also supporting the State's energy goals and investments. Using information obtained from the annual report on the investments of RGGI proceeds published by RGGI Inc.<sup>26</sup>, in comparison to other RGGI states Maryland has made a significantly lower level of RGGI investments in energy efficiency; 27% by Maryland versus 67% by the other eight RGGI states. With approximately 25% of Maryland in-state generation in calendar year 2017 derived from

---

<sup>24</sup> PSC Order No. 88631.

<sup>25</sup> PSC Case No. 9449, Notice of Hearing and Request for Comments, August 7, 2018.

<sup>26</sup> Regional Greenhouse Gas Initiative, Inc., "The Regional Greenhouse Gas Initiative: An Initiative of the New England and Mid-Atlantic States of the US, The Investment of RGGI Proceeds in 2016", September 2018, [https://www.rggi.org/sites/default/files/Uploads/Proceeds/RGGI\\_Proceeds\\_Report\\_2016.pdf](https://www.rggi.org/sites/default/files/Uploads/Proceeds/RGGI_Proceeds_Report_2016.pdf).

coal<sup>27</sup>, energy efficiency is a critical element in reducing demand on the grid and in reducing greenhouse gas emissions. Moving forward, reconsideration of the RGGI revenue allocation formula set forth in §9-20B-05 may be warranted.

#### *SEIF Advisory Board*

The Strategic Energy Investment Advisory Board (Board) most recently met on November 16, 2018 at the Montgomery Park Business Center in Baltimore. Members received briefings on the Regional Greenhouse Gas Initiative (RGGI) auctions. Proceeds from the RGGI CO2 allowance auctions are returned to member states and have been primarily invested in consumer benefit programs: energy efficiency, renewable energy, direct energy bill assistance, and other greenhouse gas reduction programs.

Both a winter and spring meeting have been scheduled for the Board. The winter meeting is scheduled to take place in Annapolis on the Monday following the Martin Luther King, Jr. holiday. Topics to be discussed include the quarterly RGGI auction results, the proposed fiscal year 2020 budget released by Governor Hogan, and possible program changes. The spring meeting is tentatively scheduled to take place April 22, and will once again be hosted at the Montgomery Park Business Center. Topics to be discussed include the quarterly RGGI auction results, fiscal year 2020 budget results, and a legislative session review.

---

<sup>27</sup> Based on data obtained from the U.S. Energy Information Administration, Detailed State Data, Net Generation by State and by Type of Producer by Energy Source (EIA-906, EIA-920, and EIA-923), Final annual data for 2017, Release Date: October 12, 2018.

## APPENDIX A: SEIF Funding Details

SEIF Expenditures and Appropriations		
	FY2018	FY2019
	<i>Actual</i>	<i>Appropriation</i>
Maryland Dept. of the Environment- RGGI, Inc. Dues	\$ 498,702	\$ 550,000
Electric Vehicle Tax Credits	\$ 2,400,000	\$ 2,400,000
University of Maryland (Maryland Energy Innovation Fund)	\$ 1,500,000	\$ 1,500,000
Dept. of Human Services- Energy Bill Assistance	\$ 27,000,000	\$ 26,000,000
Department of General Services	\$ 999,291	\$ 500,000
Dept. of Health –Energy Performance Contracting (EPC) Repayments	\$ 2,250,730	\$ 2,184,694
Dept. Housing and Community Development	\$ 1,915,606	\$ -
Maryland Department of the Environment	\$ 2,739,497	\$ 10,550,000

## APPENDIX B: FY18 Grantees Receiving Multiple SEIF Awards

Appendix B contains a summary of individuals and/or addresses identified by MEA as receiving multiple awards from the Strategic Energy Investment Fund in FY18.

There are several ways that non-profit organizations, counties, local governments, and businesses can be eligible for multiple awards in a given fiscal year from the Strategic Energy Investment Fund. A list of entities receiving multiple awards in FY18 can be found in Table 1 below. Examples of ways that an entity can receive multiple awards include:

- A portion of the Clean Energy Communities Low-to-Moderate income program is offered on a county-by-county basis to ensure geographical diversity. In this way, a non-profit organization that wishes to implement projects in several counties could submit applications in each county, resulting in the possibility of multiple awards.
- The Transportation program’s commercial Electric Vehicle Supply Equipment rebates allow commercial entities to be eligible to receive multiple awards if multiple stations have been installed.
- Entities can opt to participate in more than one energy program. Several counties and local governments participate in multiple MEA energy efficiency programs.

**Table 1: Non-residential Entities Receiving Multiple SEIF Awards in FY18**

Program Name	MEA Award	Funding Amount to the Award
Clean Energy Communities Low-to-Moderate Income Community Grants	Today's Dream Tomorrow's Future (Anne Arundel County)	\$ 50,000
Clean Energy Communities Low-to-Moderate Income Community Grants	Today's Dream Tomorrow's Future (Baltimore County)	\$ 50,000
Clean Energy Communities Low-to-Moderate Income Community Grants	Today's Dream Tomorrow's Future (Charles County)	\$ 50,000
Clean Energy Communities Low-to-Moderate Income Community Grants	Today's Dream Tomorrow's Future (Prince George’s County)	\$ 50,000
Electric Vehicle Supply Equipment Rebate Program	Electric Vehicle Institute	\$ 12,000
Electric Vehicle Supply Equipment Rebate Program	Electric Vehicle Institute	\$ 8,000
Freedom Fleet Voucher Program	XL Hybrids for Prince George's County	\$ 9,640
Freedom Fleet Voucher Program	XL Hybrids for Prince George's County	\$ 43,960
Freedom Fleet Voucher Program	XL Hybrids for Montgomery County	\$ 79,940
Freedom Fleet Voucher Program	XL Hybrids for Montgomery County	\$ 27,475
Freedom Fleet Voucher Program	XL Hybrids for Montgomery County	\$ 5,495
Clean Energy Communities Low-to-Moderate Income Community Grants	Habitat for Humanity Metro Maryland (Montgomery County)	\$ 55,000
Clean Energy Communities Low-to-Moderate Income Community Grants	Habitat for Humanity Metro Maryland (Prince George’s County)	\$ 66,000

Freedom Fleet Voucher Program	XL Hybrids for Allan Myers	\$ 5,495
Freedom Fleet Voucher Program	XL Hybrids for Allan Myers	\$ 5,495
Freedom Fleet Voucher Program	XL Hybrids for Allan Myers	\$ 21,980
Freedom Fleet Voucher Program	IG Burton & Co. Inc. for Jubb's Bus Service	\$ 8,150
Freedom Fleet Voucher Program	IG Burton & Co. Inc. for Jubb's Bus Service	\$ 16,300
Freedom Fleet Voucher Program	IG Burton & Co. Inc. for Jubb's Bus Service	\$ 8,150
Freedom Fleet Voucher Program	IG Burton & Co. Inc. for MBG	\$ 65,200
Freedom Fleet Voucher Program	IG Burton & Co. Inc. for MBG	\$ 8,150
Freedom Fleet Voucher Program	IG Burton & Co. Inc. for MBG	\$ 8,150
Freedom Fleet Voucher Program	IG Burton & Co. Inc. for MBG	\$ 8,150
Community Solar	Ogos Energy LLC-Shepherds Mill Road Community Solar	\$ 440,000
Community Solar	Ogos Energy LLC- New Windsor Community Solar	\$ 432,000
Electric Vehicle Supply Equipment Rebate Program	Electric Vehicle Institute	\$ 8,000
Electric Vehicle Supply Equipment Rebate Program	Electric Vehicle Institute	\$ 4,000
Electric Vehicle Supply Equipment Rebate Program	Electric Vehicle Institute	\$ 8,000
Electric Vehicle Supply Equipment Rebate Program	Electric Vehicle Institute	\$ 8,000
Electric Vehicle Supply Equipment Rebate Program	Electric Vehicle Institute	\$ 8,000
Electric Vehicle Supply Equipment Rebate Program	Electric Vehicle Institute	\$ 8,000
Maryland Smart Energy Communities	City of Baltimore	\$ 50,000
Clean Energy Communities Low-to-Moderate Income Community Grants	City of Baltimore	\$ 125,000
Electric Vehicle Supply Equipment Rebate Program	Electric Vehicle Institute	\$ 8,000
Clean Energy Communities Low-to-Moderate Income Community Grants	Civic Works, Inc. (Statewide award)	\$ 120,000
Clean Energy Communities Low-to-Moderate Income Community Grants	Civic Works, Inc. (Baltimore City)	\$ 265,000
Clean Energy Communities Low-to-Moderate Income Community Grants	Civic Works, Inc. (Baltimore County)	\$ 170,000
Offshore Wind Business Development	Jane Addams Resource Corporation	\$ 200,000
Electric Vehicle Supply Equipment Rebate Program	Electric Vehicle Institute	\$ 16,000
Electric Vehicle Supply Equipment Rebate Program	Electric Vehicle Institute	\$ 16,000
Electric Vehicle Supply Equipment Rebate Program	Electric Vehicle Institute	\$ 8,000
Clean Energy Communities Low-to-Moderate Income Community Grants	Arundel Community Development Services (Anne Arundel County)	\$ 100,000

Clean Energy Communities Low-to-Moderate Income Community Grants	Arundel Community Development Services (Statewide award)	\$ 200,000
Clean Energy Communities Low-to-Moderate Income Community Grants	Habitat for Humanity Choptank (Dorchester County)	\$ 25,000
Clean Energy Communities Low-to-Moderate Income Community Grants	Habitat for Humanity Choptank (Talbot County)	\$ 25,000
Clean Energy Communities Low-to-Moderate Income Community Grants	Choptank Electric Cooperative (Kent County)	\$ 25,000
Clean Energy Communities Low-to-Moderate Income Community Grants	Choptank Electric Cooperative (Cecil County)	\$ 55,000
Clean Energy Communities Low-to-Moderate Income Community Grants	Choptank Electric Cooperative (Statewide award)	\$ 165,000
Clean Energy Communities Low-to-Moderate Income Community Grants	Choptank Electric Cooperative (Queen Anne's County)	\$ 25,000
Freedom Fleet Voucher Program	Caroline County Public Schools	\$ 8,150
Freedom Fleet Voucher Program	Caroline County Public Schools	\$ 8,150
Clean Energy Communities Low-to-Moderate Income Community Grants	Washington County Housing Solutions	\$ 71,660
Clean Energy Communities Low-to-Moderate Income Community Grants	Washington County Housing Solutions (Statewide award)	\$ 200,000
Freedom Fleet Voucher Program	AutoPort, Inc. for Lower Shore Enterprises	\$ 8,400
Freedom Fleet Voucher Program	AutoPort, Inc. for Lower Shore Enterprises	\$ 8,500
Clean Energy Communities Low-to-Moderate Income Community Grants	SAFE Housing (Allegany County)	\$ 325,000
Clean Energy Communities Low-to-Moderate Income Community Grants	SAFE Housing (Somerset County)	\$ 200,000
Community Solar	ESA Renewables -Legore	\$ 95,000
Community Solar	ESA Renewables- Sparks Glenco	\$ 224,000
Clean Energy Communities Low-to-Moderate Income Community Grants	United Communities Against Poverty (Prince George's County)	\$ 184,000
Clean Energy Communities Low-to-Moderate Income Community Grants	United Communities Against Poverty (Statewide award)	\$ 130,000
Clean Energy Communities Low-to-Moderate Income Community Grants	Community Action Council of Howard County (for work in Caroline County)	\$ 25,000
Clean Energy Communities Low-to-Moderate Income Community Grants	Community Action Council of Howard County (for work in Howard County)	\$ 65,000
Clean Energy Communities Low-to-Moderate Income Community Grants	Community Action Council of Howard County (Statewide award)	\$ 200,000
Clean Energy Communities Low-to-Moderate Income Community Grants	Community Action Council of Howard County (for work in Wicomico County)	\$ 65,000
Maryland Smart Energy Communities	Frederick County	\$ 87,182
Clean Energy Communities Low-to-Moderate Income Community Grants	Frederick County	\$ 350,000
Clean Energy Communities Low-to-Moderate Income Community Grants	SHORE UP! (Somerset County)	\$ 25,000

Clean Energy Communities Low-to-Moderate Income Community Grants	SHORE UP! (Worcester County)	\$ 25,000
Combined Heat and Power	Montgomery County - Animal Services and Adopter Center	\$ 131,250
Combined Heat and Power	Montgomery County - Wheaton Library and Recreation Center	\$ 40,250
Maryland Smart Energy Communities	Montgomery County	\$ 85,000
Commercial Clean Energy Grant Program	Intelligent Green Solutions for Dennis Horst Farm	\$ 4,718
Commercial Clean Energy Grant Program	Intelligent Green Solutions for Ganoe Farm	\$ 4,718
Commercial Clean Energy Grant Program	Intelligent Green Solutions for Singing Valley Farm	\$ 4,718
Commercial Clean Energy Grant Program	Intelligent Green Solutions for Grossnickle Farms	\$ 4,633
Commercial Clean Energy Grant Program	Intelligent Green Solutions for Dublin Hills Farm	\$ 4,718
Commercial Clean Energy Grant Program	Intelligent Green Solutions for Roderick Farm	\$ 4,718
Commercial Clean Energy Grant Program	Intelligent Green Solutions for Valentine Farm	\$ 4,718
Commercial Clean Energy Grant Program	Intelligent Green Solutions for Shafdon Farm	\$ 4,718
Community Solar	Power 52- Raphel Road	\$ 291,000
Community Solar	Power 52- Henryton Road	\$ 370,000

As an individual, one way that it is possible to receive multiple awards from the Strategic Energy Investment Fund is by participating in the Clean Energy Grant Program after installing more than one renewable energy technology. Another potential way is to participate in the Clean Energy Grant Program in conjunction with the Electric Vehicle Supply Equipment rebate program, which provides financial incentives for electric vehicle charging equipment. A list of the individuals who individually received multiple awards, or whose address received multiple awards, is shown below in Table 2.

**Table 2: Individuals who have received (or whose address has received) multiple SEIF awards in FY18**

Program Name	MEA Award	Amount
Residential Renewable Grants	Sawyer, Johnny	\$ 1,000
Electric Vehicle Supply Equipment Rebate Program	Sawyer, Johnny	\$ 270
Electric Vehicle Supply Equipment Rebate Program	Anderson, Megan	\$ 636

Electric Vehicle Supply Equipment Rebate Program	Smith, Kevin	\$ 480
Residential Renewable Grants	Wright, Samuel	\$ 1,000
Electric Vehicle Supply Equipment Rebate Program	Wright, Samuel	\$ 524
Residential Renewable Grants	Boyce, Kevin	\$ 1,000
Electric Vehicle Supply Equipment Rebate Program	Boyce, Kevin	\$ 249
Residential Renewable Grants	Sze, Jeffrey	\$ 3,000
Electric Vehicle Supply Equipment Rebate Program	Sze, Jeffrey	\$ 649
Residential Renewable Grants	Nelms, Justin	\$ 3,000
Electric Vehicle Supply Equipment Rebate Program	Nelms, Justin	\$ 650
Residential Renewable Grants	Dien, Joseph	\$ 3,000
Electric Vehicle Supply Equipment Rebate Program	Dien, Joseph	\$ 700
Electric Vehicle Supply Equipment Rebate Program	Malik, Faris	\$ 410
Electric Vehicle Supply Equipment Rebate Program	Weinstein, Shlomo	\$ 700
Residential Renewable Grants	Donahue, Patrick	\$ 1,000
Electric Vehicle Supply Equipment Rebate Program	Anand, Manpreet	\$ 556
Electric Vehicle Supply Equipment Rebate Program	Ye, Qin	\$ 544
Residential Renewable Grants	Ye, Qin	\$ 1,000
Electric Vehicle Supply Equipment Rebate Program	Hitz, James	\$ 470
Electric Vehicle Supply Equipment Rebate Program	Hitz, Susan	\$ 470
Electric Vehicle Supply Equipment Rebate Program	Colavito, Christopher	\$ 514
Residential Renewable Grants	Colavito, Christopher	\$ 1,000
Residential Renewable Grants	Joiner, Joanna	\$ 1,000

Electric Vehicle Supply Equipment Rebate Program	da Silva, Arlindo	\$ 683
Residential Renewable Grants	Tyson, Gregory	\$ 1,000
Electric Vehicle Supply Equipment Rebate Program	Tyson, Gregory	\$ 554
Electric Vehicle Supply Equipment Rebate Program	Bronsdon, Michael	\$ 296
Residential Renewable Grants	Bronsdon, Michael	\$ 1,000
Residential Renewable Grants	Smith, Anthony	\$ 3,000
Residential Renewable Grants	Smith, Paulette	\$ 350
Residential Renewable Grants	Heath, Allan	\$ 1,000
Residential Renewable Grants	Heath, Allan	\$ 500
Residential Renewable Grants	Linkous, Frank	\$ 3,000
Residential Renewable Grants	Linkous, Frank	\$ 500
Residential Renewable Grants	Ackerman, Thomas	\$ 1,000
Residential Renewable Grants	Ackerman, Thomas	\$ 500
Residential Renewable Grants	Swisher, Suzanne	\$ 1,000
Residential Renewable Grants	Swisher, Suzanne	\$ 3,000
Residential Renewable Grants	Baumel, Mark	\$ 3,000
Residential Renewable Grants	Baumel , Mark	\$ 1,000
Residential Renewable Grants	Lewis-Antcliff Jean	\$ 1,000
Residential Renewable Grants	Lewis-Antcliff, Jean	\$ 500
Residential Renewable Grants	Keyser, John	\$ 3,000
Electric Vehicle Supply Equipment Rebate Program	Keyser, John	\$ 700
Electric Vehicle Supply Equipment Rebate Program	Thacher, Darrell	\$ 318

Residential Renewable Grants	Thacher, Darrell	\$ 1,000
Residential Renewable Grants	Del Bosque, Augusta	\$ 1,000
Electric Vehicle Supply Equipment Rebate Program	Del Bosque, Augusta	\$ 190

## Appendix C: FY18 Grantees

The following pages contain a list of more than 3,400 grant awards issued by the Maryland Energy Administration in FY18. Awards are organized first by program, using the program order shown in the Table of Contents, and then alphabetically within each individual program. To further aid in the navigation of Appendix C, each award is preceded by the name of the program and the letter assigned to the program in the Table of Contents.

The FY18 program with the largest number of participants by far is the Residential Clean Energy Grant Program. A list of incentives, by technology, for this program in FY18 is shown below for reference.

**Table 3: Residential Clean Energy Grant Program Incentives by Technology**

Technology	Award
Solar Photovoltaics (PV)	\$1,000/project
Solar Water Heating (SWH)	\$500/project
Geothermal Heating & Cooling (GHC)	\$3,000/project
Geothermal Heating & Cooling (GHC) replacement	\$500/project
Wind	\$3,000 per kW of normalized capacity
Stick (wood) Burning Stove	\$500/installation with an EPA efficiency rating; \$250/installation without an EPA efficiency rating
Pellet Burning Stove	\$700/installation with an EPA efficiency rating; \$350 without an EPA efficiency rating

For brevity, the following program names will be abbreviated as follows:

- the Clean Energy Communities Low-to-Moderate Income Grant Program shall be identified as the LMI Program;
- the Clean Energy Grant Program- Solar Canopies with EV Charging shall be identified as the Solar PV Canopies Program;
- the Commercial Clean Energy Grant Program shall be identified as Commercial CEGP;
- the Residential Clean Energy Grant Program shall be identified as the Residential CEGP;
- the Commercial and Industrial Grant Program shall be identified as the C&I Program;
- the Electric Vehicle Supply Equipment Rebate Program shall be identified as Transportation- EVSE; and,
- the Freedom Fleet Voucher Program shall be identified as Transportation- Freedom Fleet.

**Table 4: FY18 Grantees<sup>28</sup>**
