FY24 Energy Efficiency Equity Grant Program

Program Description: Available to nonprofit organizations and local governments, the Maryland Energy Administration's (MEA) Energy Efficiency Equity Grant Program ("EEE Program", "the Program", formerly known as the Low-to-Moderate Income Energy Efficiency Grant Program) is designed to support energy efficiency projects and activities benefiting low-to-moderate income (LMI) Marylanders. Grants are awarded for energy efficiency projects that generate significant reductions in energy use and pass on the benefits of the savings to Maryland's LMI residents.

The EEE Program first allocates funding regionally based on the number of LMI households located within the respective region to ensure an equitable

distribution of grant funds. Grants are then competitively awarded within the applicant pool for each region.

Type of Program: Competitive Grant Program

Application Deadline: Friday, February 16th, 2024, by 5 PM EST

Anticipated Program Budget: \$19.5 million total program budget anticipated for FY24, to be allocated regionally across Maryland.

For an overview of the Program, including the regional allocations, please see the Funding Opportunity Announcement below.

Program Documents:
