The Idle Reduction Technology Grant Program provides financial assistance for installation and equipment costs associated with idle reduction technology on trucks. Grants will be used to reduce 50% of the installed equipment cost up to a maximum of $3,000 per truck.

Applications are now being accepted on a first come first serve basis.

Eligible SmartWay Verified Technologies Include

- Auxiliary Power Units (APU)
- Fuel Operated Heaters (FOH)
- Electric Truck Refrigeration Units (eTRU)
- Battery Operated Air Conditioning Systems (BAC)
- Thermal Storage Systems (TSS)
- On-board (truck mounted) accessories such as inverters, battery upgrades, electrical connections and electric heaters and air conditioning units.

Eligible Vehicles

- On-highway class 6 to class 8 trucks. Buses are not eligible.
- Maryland registered trucks including new trucks which will be registered in Maryland.
- Leased vehicles are eligible to apply.

Applications due
4 p.m. September 1, 2014
